NOTES TO FINANCIAL STATEMENTS

1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN:

A. Accounting Practices

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the Iowa Department of Commerce, Insurance Division (the “Insurance Division”).

The Insurance Division recognizes only statutory accounting practices prescribed or permitted by the State of Iowa for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under Iowa Insurance Law. The National Association of Insurance Commissioners’ (“NAIC”) *Accounting Practices and Procedures Manual* (“NAIC SAP”) has been adopted as a component of prescribed or permitted practices by the Insurance Division. The Company differs from NAIC SAP via application of Bulletin 08-18, *Accounting for Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve* ("Bulletin 08-18"), a prescribed practice issued by the Insurance Division. Under this prescribed practice, call option derivative instruments that hedge the growth in interest credited on index products are accounted for at amortized cost with the corresponding amortization recorded as a decrease to net investment income and indexed annuity reserves are calculated based on Standard Valuation Law and Guideline 35 assuming the market value of the call options associated with the current index term is zero regardless of the observable market value for such options.

The Company also differs from NAIC SAP under Iowa Code Section 508, *Individual annuity or pure endowment contracts* ("Section 508"). Section 508 allows a one year delay in implementation of the 2012 IAR Mortality Table implemented by the NAIC. The 2012 IAR Mortality Table will be utilized beginning January 1, 2016.

A reconciliation of the Company’s net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the Insurance Division is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make certain estimates that affect the reported assets and liabilities, including reporting or disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Future events, including changes in interest rates and asset valuations, could cause actual results to differ in the near term from the estimates used in the financial statements.

NOTES TO FINANCIAL STATEMENTS

The most significant estimates include those used in determining policy reserves, impairment losses on investments and federal income taxes. Although some variability is inherent in these estimates, the recorded amounts reflect management's best estimates based on facts and circumstances as of the date of the financial statements. Management believes the amounts provided are appropriate.

C. Accounting Policy

Investments

Investments in bonds (except NAIC Class 6 rated bonds) and short-term investments are reported at cost adjusted for amortization of premiums or discounts. Bonds with NAIC 6 ratings are reported at the lower of amortized cost or fair value. Amortization is computed using methods which result in a level yield over the life of the security. The Company reviews its prepayment assumptions on mortgage and other asset-backed securities at regular intervals and adjusts amortization rates retrospectively when such assumptions are changed due to experience and/or expected future patterns. Other admitted assets are valued principally at cost as required or permitted by Iowa insurance laws.

Realized capital gains and losses are recorded on the trade date and determined on the basis of specific identification and are recorded net of related federal income taxes and amounts transferred to the Interest Maintenance Reserve ("IMR"). Under a formula prescribed by the NAIC, the Company defers, in the IMR, the portion of realized gains and losses on sales of fixed income investments, principally bonds, attributable to changes in the general level of interest rates and amortizes those deferrals over the remaining period to maturity of the security. The Asset Valuation Reserve ("AVR") is established by the Company to provide for anticipated losses in the event of default by issuers of certain invested assets. The AVR is determined using a formula that is intended to establish a reserve to offset potential credit-related investment losses.

The carrying values of all investments are reviewed on an ongoing basis for credit deterioration. An Other Than Temporary Impairment ("OTTI") shall be considered to have occurred if it is probable that the reporting entity will be unable to collect all amounts due according to the contractual terms of a debt security in effect at the date of acquisition. If this review indicates a decline in fair value that is other than temporary, the carrying amount of the investment, other than loan-backed and structured securities, is reduced to its fair value and a specific OTTI is taken. A decline in fair value which is other than temporary includes situations where the Company has made a decision to sell a security prior to its maturity at an amount below its carrying value. Such reductions in carrying values are recognized as realized losses on investments.

If the fair value of a loan-backed or structured security is less than its amortized cost at the reporting date, the Company assesses whether the impairment is other than temporary. If the Company intends to sell the loan-backed or structured security, an OTTI is considered to have occurred and a loss is recognized through earnings in an amount equal to the excess of amortized cost over fair value at the reporting date.

If the Company does not intend to sell the loan-backed or structured security, the Company assesses whether it has the intent and ability to retain the investment in the security for a period of time sufficient to recover the amortized cost. If the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost, an OTTI is considered to have occurred and a loss is recognized through earnings in an amount equal to the excess of amortized cost over fair value at the reporting date.

If the Company does not expect to recover the amortized cost basis of the security, it is unable to assert that it will recover its amortized cost even if it does not intend to sell the security and the entity has the intent and ability to hold such security, an OTTI is considered to have occurred and a loss is recognized in an amount equal to the excess of amortized cost over the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate.

Interest income is recognized on an accrual basis. Dividend income is recognized when declared. The Company does not accrue income on bonds in default which are delinquent more than twelve months. Further, income is not accrued when collection is uncertain.

Derivative Instruments

Effective December 31, 2008, the Company adopted Bulletin 08-18. Under this prescribed practice, call option derivative instruments that hedge the growth in interest credited on index products are accounted for at amortized cost with the corresponding amortization recorded as a decrease to net investment income.

The Company's hedging strategy attempts to mitigate any potential risk of loss under these agreements through a regular monitoring process which evaluates the program's effectiveness. The Company purchases its option contracts

NOTES TO FINANCIAL STATEMENTS

from its parent, American Equity Investment Life Insurance Company (“American Equity Life”), who purchases its options from nationally recognized investment banking institutions.

Cash and Short-Term Investments

For purposes of the statement of cash flows, the Company considers all highly liquid debt instruments purchased with an original maturity of twelve months or less to be short-term investments.

Policy Reserves

The reserves for annuity policies, developed by actuarial methods, are established and maintained on the basis of published mortality and morbidity tables using assumed interest rates and valuation methods that will provide, in the aggregate, reserves that are not less than the minimum valuation required by law or guaranteed policy cash values.

Federal Income Taxes

In accordance with SSAP No. 101, *Income Taxes, A Replacement of SSAP NO. 10R and SSAP NO. 10* (“SSAP No. 101”), current income taxes are charged or credited to operations and/or realized gains (losses) based on amounts estimated to be payable or recoverable as a result of taxable operations for the current year and for federal income taxes incurred or received during the current year relating to prior periods, to the extent not previously provided.

Recognition of Premium Revenue and Costs

Annuity considerations are recognized as revenue when received and the policy is issued. Costs incurred in acquiring new business, including acquisition costs such as commissions, are charged to operations as incurred.

Capital and Surplus

The payment of dividends is subject to regulation by the Insurance Division. The Company is required to maintain a minimum total statutory-basis capital and surplus of not less than \$5,000,000 under the provisions of insurance laws of the State of Iowa.

8. The Company accrues interest income on impaired loans to the extent it is deemed collectible (delinquent less than 90 days) and the loan continues to perform under its original or "workout" (e.g. interest only) terms. Interest income on non-performing loans (e.g. loans 90 days or more past due and/or collateral dependent loans) is generally recognized on a cash basis.

B. Debt Restructuring

The Company has no invested assests that are restructured debt as of December 31, 2015.

C. Reverse Mortgages

D. Loan-Backed Securities

2. For the year ended December 31, 2015, the Company did not recognize any other than temporary impairments ("OTTI") on its loan-backed securities.

NOTES TO FINANCIAL STATEMENTS

3. The Company did not have any loan-backed securities for which the present value of cash flows expected to be collected was less than amortized cost, and as a result no other-than-temporary impairments were recorded during the year ended December 31, 2015.
4. For loan-backed and structured securities with unrealized losses as of December 31, 2015, the gross unrealized losses and fair value, aggregated by length of time that individual securities have been in a continuous unrealized loss position are summarized as follows:
- | | | |
|---|----|------------|
| a. Aggregate amount of unrealized loss: | | |
| Less than 12 months | \$ | 1,190,865 |
| 12 months or longer | \$ | — |
| b. Aggregate related fair value of securities with unrealized losses: | | |
| Less than 12 months | \$ | 39,334,030 |
| 12 months or longer | \$ | — |
5. The process for evaluating loan-backed securities is based on a number of factors. The primary consideration in the evaluation process is the issuer’s ability to meet current and future interest and principal payments as contractually stated at the time of purchase. The review of these securities includes an analysis of the cash flow modeling under various default scenarios considering independent third party benchmarks, the seniority of the specific tranche within the structure of the security, the composition of the collateral and the actual default, loss severity and prepayment experience exhibited. With the input of third party assumptions for default projections, loss severity and prepayment expectations, the Company evaluates the cash flow projections to determine whether the security is performing in accordance with its contractual obligations.

At December 31, 2015, the Company had no exposure to subprime loan-backed securities. All of the owned loan-backed securities are pools of residential mortgage loans. Substantially all of the owned securities are in the highest rated tranche of the pool in which they are structured and are not subordinated to any other tranche.

B. At December 31, 2015, no amounts were excluded from investment income due and accrued.

8 - DERIVATIVE INSTRUMENTS:

The Company uses call options to pay the benefit provided for in the Company's indexed annuity insurance products. The financial characteristics of the call options purchased by the Company generally provide for the Company to be paid the average one-year appreciation of various published indices. The term of the call options is generally one year. The Company pays cash to the counterparty based upon an agreed price at the outset of the contract. The counterparty usually pays a single payment at each due date.

The Company purchases its option contracts from its parent, American Equity Life, who purchases its options from nationally recognized investment banking institutions. The Company is exposed to risk of loss in the event of nonperformance by the counterparties and, accordingly, American Equity Life purchases its option contracts from multiple counterparties and evaluates the creditworthiness of all counterparties prior to purchase of the contracts.

In accordance with Bulletin 08-18, call option derivative instruments that hedge the growth in interest credited on index products, are accounted for at amortized cost with the corresponding amortization recorded as a decrease to net investment income.

For the year ended December 31, 2015, proceeds received upon expiration of options and amortization of options (see Note 1 Derivative Instruments) included as components of net investment income were as follows:

NOTES TO FINANCIAL STATEMENTS

The following methods and assumptions were used by the Company in estimating the fair values of financial instruments.

Bonds: The fair values of bonds are obtained from third parties and are based on quoted market prices when available. The third parties use yield data and other factors relating to instruments or securities with similar characteristics to determine fair value for securities that are not actively traded.

Mortgage loans on real estate: The fair values of mortgage loans on real estate are calculated using discounted expected cash flows using current competitive market interest rates currently being offered for similar loans.

Cash and short-term investments: Amounts reported in the statutory-basis balance sheets for these instruments are reported at their historical cost which approximates fair value due to the nature of the assets assigned to this category.

Derivatives: The fair values of the Company's derivatives are based upon the amount of cash the Company will receive to settle each derivative instrument. The amounts are obtained from the counterparty.

Annuity reserves: The fair values of the liabilities under contracts are stated at the cost the Company would incur to extinguish the liability (i.e., the cash surrender value).
