For the quarterly period ended June 30, 2021

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number : 001-31911

American Equity Investment Life Holding Company

(Exact name of registrant as specified in its charter)

Iowa

(State or other jurisdiction of incorporation or organization)

42-1447959

(I.R.S. Employer Identification No.)

6000 Westown Parkway
West Des Moines, Iowa 50266

(Address of principal executive offices, including zip code)

(515) 221-0002

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common stock, par value \$1	AEL	New York Stock Exchange
Depository Shares, each representing a 1/1,000th interest in a share of 5.95% Fixed-Rate Reset Non-Cumulative Preferred Stock, Series A	AELPRA	New York Stock Exchange
Depository Shares, each representing a 1/1,000th interest in a share of 6.625% Fixed-Rate Reset Non-Cumulative Preferred Stock, Series B	AELPRB	New York Stock Exchange

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Sections 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

APPLICABLE TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

As of August 4, 2021, there were 92,512,821 shares of the registrant's common stock, \$1 par value, outstanding.

AMERICAN EQUITY INVESTMENT LIFE HOLDING COMPANY AND SUBSIDIARIES**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

June 30, 2021
(Unaudited)

1. Significant Accounting Policies**Consolidation and Basis of Presentation**

The accompanying consolidated financial statements of American Equity Investment Life Holding Company ("we", "us", "our" or the "Company") have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. The consolidated financial statements include a variable interest entity ("VIE") in which we are the primary beneficiary. All of the adjustments in the consolidated financial statements are normal recurring items which are necessary to present fairly our financial position and results of operations on a basis consistent with the prior audited consolidated financial statements. Operating results for the three and six month periods ended June 30, 2021 are not necessarily indicative of the results that may be expected for any other period, including for the year ended December 31, 2021. All significant intercompany accounts and transactions have been eliminated. The preparation of financial statements requires management estimates and assumptions using subjective and complex judgments that frequently require assumptions about matters that are inherently uncertain. Our actual results could differ from these estimates. For further information related to a description of areas of judgment and estimates and other information necessary to understand our financial position and results of operations, refer to the audited consolidated financial statements and notes included in our Annual Report on Form 10-K for the year ended December 31, 2020.

Real Estate Investments

Beginning in the second quarter of 2021, we held residential real estate investments through consolidation of an investment company VIE. Residential real estate investments are reported at fair value and the change in fair value on these investments is reported in net income as a component of net investment income. Fair values of residential real estate are initially based on the cost to purchase the properties and subsequently based on a discounted cash flow methodology. See Note 3 – Fair Values of Financial Instruments for more information on the determination of fair value. The residential real estate investments are leased to renters through operating lease arrangements. Rental income is recognized on a straight-line basis over the term of the respective leases.

Variable Interest Entities

We have relationships with various special purpose entities and other legal entities that must be evaluated to determine if the entities meet the criteria of a VIE. This assessment is performed by reviewing contractual, ownership and other rights and requires use of judgment. First, we determine if we hold a variable interest in an entity by assessing if we have the right to receive expected losses and expected residual returns of the entity. If we hold a variable interest, then the entity is assessed to determine if it is a VIE. An entity is a VIE if the equity at risk is not sufficient to support its activities, if the equity holders lack a controlling financial interest or if the entity is structured with non-substantive voting rights. In addition to the previous criteria, if the entity is a limited partnership or similar entity, it is a VIE if the limited partners do not have the power to direct the entity's most significant activities through substantive kick-out rights or participating rights. A VIE is evaluated to determine the primary beneficiary. The primary beneficiary of a VIE is the enterprise with (1) the power to direct the activities of a VIE that most significantly impact the entity's economic performance and (2) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE. When we are the primary beneficiary, we are required to consolidate the entity in our financial statements. We reassess our involvement with VIEs on a quarterly basis. For further information about VIEs, refer to Note 6 - Variable Interest Entities.

Adopted Accounting Pronouncements

There were no accounting pronouncements that were adopted during the current period.

In June 2016, the Financial Accounting Standards Board ("FASB") issued an accounting standards update ("ASU") that significantly changed the impairment model for most financial assets that are measured at amortized cost and certain other instruments from an incurred loss model to an expected loss model that requires these assets be presented at the net amount expected to be collected. In addition, credit losses on available for sale debt securities are recorded through an allowance account subsequent to the adoption of this ASU. We adopted this ASU on January 1, 2020. The adoption of this ASU resulted in an increase in our mortgage loan allowance for credit losses of \$8.6 million and the recognition of an allowance for credit losses on our reinsurance recoverable/coinsurance deposits balances of \$3.2 million on the date of adoption. Retained earnings was decreased by \$9.3 million, which reflects the net of tax impact of the increase in the mortgage loan allowance for credit losses and the recognition of an allowance for credit losses on our reinsurance recoverable/coinsurance deposits balances on the date of adoption.

New Accounting Pronouncements

In August 2018, the FASB issued an ASU that revises certain aspects of the measurement models and disclosure requirements for long duration insurance and investment contracts. The FASB's objective in issuing this ASU is to improve, simplify, and enhance the accounting for long-duration contracts. The revisions include updating cash flow assumptions in the calculation of the liability for traditional life products, introducing the term 'market risk benefit' ("MRB") and requiring all contract features meeting the definition of an MRB to be measured at fair value, simplifying the method used to amortize deferred policy acquisition costs and deferred sales inducements to a constant basis over the expected term of the related contracts rather than based on actual and estimated gross profits and enhancing disclosure requirements. While this ASU is effective for us on January 1, 2023, the transition date (the remeasurement date) is January 1, 2021. Early adoption of this ASU is permitted. We are in the process of evaluating the impact this guidance will have on our consolidated financial statements.

2. Revision of Immaterial Misstatement in Prior Year Financial Statements

Management identified an error in the Company's historical financial statements as further described below. In accordance with the guidance set forth in SEC Staff Accounting Bulletin No. 99, Materiality, and SEC Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements, management concluded that the error was not material to the consolidated financial statements as presented in the Company's quarterly and annual financial statements that had been previously filed in the Company's Quarterly Reports on Form 10-Q and Annual Reports on Form 10-K. As a result, amendment of such reports is not required. The Company revised the previously issued annual consolidated financial statements for 2020 in this Form 10-Q to correct this error.

The corrected immaterial error was in the calculation of the impact of unrealized gains and losses on lifetime income benefit reserves as of December 31, 2020 determined in the first quarter of 2021. This immaterial error resulted in an increase in the lifetime income benefit reserves which are included in policy benefit reserves in the consolidated balance sheet, an increase in the deferred policy acquisition costs and deferred sales inducements and a decrease in deferred income taxes with an offsetting change in accumulated other comprehensive income which is a component of total stockholders' equity. The immaterial error had no impact on the consolidated statement of operations or consolidated statement of cash flows.

The effect of the revisions on the Company's previously issued financial statements are provided in the tables below. Amounts throughout the consolidated financial statements and notes thereto have been adjusted to incorporate the revised amounts, where applicable. The following tables reconcile selected lines from the Company's year-end December 31, 2020 consolidated balance sheet and the three and six months ended June 30, 2020 consolidated statement of comprehensive income from the previously reported amounts to the revised amounts.

Revised Consolidated Balance Sheet

	Year Ended December 31, 2020		
	As Reported	Adjustment	As Revised
	(Dollars in thousands)		
Assets			
Deferred policy acquisition costs	\$ 2,045,812	\$ 179,387	\$ 2,225,199
Deferred sales inducements	1,328,857	119,518	1,448,375
Total assets	71,389,674	298,905	71,688,579
Liabilities and Stockholders' Equity			
Liabilities:			
Policy benefit reserves	61,768,246	584,636	62,352,882
Deferred income taxes	564,003	(60,003)	504,000
Total liabilities	64,814,958	524,633	65,339,591
Stockholders' equity:			
Accumulated other comprehensive income	2,429,285	(225,728)	2,203,557
Total stockholders' equity	6,574,716	(225,728)	6,348,988
Total liabilities and stockholders' equity	71,389,674	298,905	71,688,579

Revised Consolidated Statement of Comprehensive Income

	Three Months Ended June 30, 2020		
	As Reported	Adjustment	As Revised
	(Dollars in thousands)		
Other comprehensive income:			
Change in net unrealized investment gains/losses (1)	\$ 1,898,567	\$ (150,891)	\$ 1,747,676
Other comprehensive income before income tax	1,898,565	(150,891)	1,747,674
Income tax effect related to other comprehensive income	(398,700)	31,686	(367,014)
Other comprehensive income	1,499,865	(119,205)	1,380,660
Comprehensive income	1,252,436	(119,205)	1,133,231

	Six Months Ended June 30, 2020		
	As Reported	Adjustment	As Revised
	(Dollars in thousands)		
Other comprehensive income:			
Change in net unrealized investment gains/losses (1)	\$ 273,492	\$ 1,554	\$ 275,046
Other comprehensive income before income tax	280,910	1,554	282,464
Income tax effect related to other comprehensive income	(58,992)	(327)	(59,319)
Other comprehensive income	221,918	1,227	223,145
Comprehensive income	217,436	1,227	218,663

(1) Net of related adjustments to amortization of deferred sales inducements, deferred policy acquisition costs and policy benefit reserves

3. Fair Values of Financial Instruments

The following sets forth a comparison of the carrying amounts and fair values of our financial instruments:

	June 30, 2021		December 31, 2020	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
(Dollars in thousands)				
Assets				
Fixed maturity securities, available for sale	\$ 46,659,256	\$ 46,659,256	\$ 47,538,893	\$ 47,538,893
Mortgage loans on real estate	4,299,945	4,457,553	4,165,489	4,327,885
Real estate investments	258,237	258,237	—	—
Derivative instruments	1,459,965	1,459,965	1,310,954	1,310,954
Other investments	962,305	962,305	590,078	590,078
Cash and cash equivalents	11,524,265	11,524,265	9,095,522	9,095,522
Coinsurance deposits	4,441,950	4,077,954	4,844,927	4,411,051
Liabilities				
Policy benefit reserves	64,182,610	55,231,714	61,406,599	52,928,174
Single premium immediate annuity (SPIA) benefit reserves	233,331	240,541	240,226	247,679
Notes payable	495,955	565,760	495,668	567,345
Subordinated debentures	78,264	86,214	78,112	87,951

Fair value is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. The objective of a fair value measurement is to determine that price for each financial instrument at each measurement date. We meet this objective using various methods of valuation that include market, income and cost approaches.

We categorize our financial instruments into three levels of fair value hierarchy based on the priority of inputs used in determining fair value. The hierarchy defines the highest priority inputs (Level 1) as quoted prices in active markets for identical assets or liabilities. The lowest priority inputs (Level 3) are our own assumptions about what a market participant would use in determining fair value such as estimated future cash flows. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, a financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument. We categorize financial assets and liabilities recorded at fair value in the consolidated balance sheets as follows:

- Level 1 - Quoted prices are available in active markets for identical financial instruments as of the reporting date. We do not adjust the quoted price for these financial instruments, even in situations where we hold a large position and a sale could reasonably impact the quoted price.
- Level 2 - Quoted prices in active markets for similar financial instruments, quoted prices for identical or similar financial instruments in markets that are not active; and models and other valuation methodologies using inputs other than quoted prices that are observable.
- Level 3 - Models and other valuation methodologies using significant inputs that are unobservable for financial instruments and include situations where there is little, if any, market activity for the financial instrument. The inputs into the determination of fair value require significant management judgment or estimation. Financial instruments that are included in Level 3 are securities for which no market activity or data exists and for which we used discounted expected future cash flows with our own assumptions about what a market participant would use in determining fair value.

Transfers of securities among the levels occur at times and depend on the type of inputs used to determine fair value of each security. There were no transfers between levels during any period presented.

Our assets and liabilities which are measured at fair value on a recurring basis as of June 30, 2021 and December 31, 2020 are presented below based on the fair value hierarchy levels:

	Total Fair Value	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(Dollars in thousands)				
June 30, 2021

The following methods and assumptions were used in estimating the fair values of financial instruments during the periods presented in these consolidated financial statements.

Fixed maturity securities

The fair values of fixed maturity securities in an active and orderly market are determined by utilizing independent pricing services. The independent pricing services incorporate a variety of observable market data in their valuation techniques, including:

- reported trading prices,
- benchmark yields,
- broker-dealer quotes,
- benchmark securities,
- bids and offers,
- credit ratings,
- relative credit information, and
- other reference data.

The independent pricing services also take into account perceived market movements and sector news, as well as a security's terms and conditions, including any features specific to that issue that may influence risk and marketability. Depending on the security, the priority of the use of observable market inputs may change as some observable market inputs may not be relevant or additional inputs may be necessary.

The independent pricing services provide quoted market prices when available. Quoted prices are not always available due to market inactivity. When quoted market prices are not available, the third parties use yield data and other factors relating to instruments or securities with similar characteristics to determine fair value for securities that are not actively traded. We generally obtain one value from our primary external pricing service. In situations where a price is not available from this service, we may obtain quotes or prices from additional parties as needed. Market indices of similar rated asset class spreads are considered for valuations and broker indications of similar securities are compared. Inputs used by the broker include market information, such as yield data and other factors relating to instruments or securities with similar characteristics. Valuations and quotes obtained from third party commercial pricing services are non-binding and do not represent quotes on which one may execute the disposition of the assets.

We validate external valuations at least quarterly through a combination of procedures that include the evaluation of methodologies used by the pricing services, comparison of the prices to a secondary pricing source, analytical reviews and performance analysis of the prices against trends, and maintenance of a securities watch list. Additionally, as needed we utilize discounted cash flow models or perform independent valuations on a case-by-case basis using inputs and assumptions similar to those used by the pricing services. Although we do identify differences from time to time as a result of these validation procedures, we did not make any significant adjustments as of June 30, 2021 and December 31, 2020.

Mortgage loans on real estate

Mortgage loans on real estate are not measured at fair value on a recurring basis. The fair values of mortgage loans on real estate are calculated using discounted expected cash flows using competitive market interest rates currently being offered for similar loans. The fair values of impaired mortgage loans on real estate that we have considered to be collateral dependent are based on the fair value of the real estate collateral (based on appraised values) less estimated costs to sell. The inputs utilized to determine fair value of all mortgage loans are unobservable market data (competitive market interest rates); therefore, fair value of mortgage loans falls into Level 3 in the fair value hierarchy.

Real estate investments

The fair values of residential real estate are initially calculated based on the cost to purchase the properties and subsequently calculated based on a discounted cash flow methodology. Under the discounted cash flow method, net operating income is forecasted assuming a 10-year hold period commencing as of the valuation date. An additional year is forecast in order to determine the residual sale price at the end of the hold period, using a residual (terminal) capitalization rate. The significant inputs into the fair value calculation under the discounted cash flow method include the capitalization rate, discount rate and vacancy rate. These inputs are unobservable market data; therefore, fair value of residential real estate falls into Level 3 in the fair value hierarchy. As of June 30, 2021, the fair value of residential real estate was calculated using recent purchase price as all properties were purchased at the end of the quarter.

Derivative instruments

The fair values of derivative instruments, primarily call options, are based upon the amount of cash that we will receive to settle each derivative instrument on the reporting date. These amounts are determined by our investment team using industry accepted valuation models and are adjusted for the nonperformance risk of each counterparty net of any collateral held. Inputs include market volatility and risk free interest rates and are used in income valuation techniques in arriving at a fair value for each option contract. The nonperformance risk for each counterparty is based upon its credit default swap rate. We have no performance obligations related to the call options purchased to fund our fixed index annuity policy liabilities.

Other investments

Equity securities are the only financial instruments included in other investments that are measured at fair value on a recurring basis. The fair value for these securities are determined using the same methods discussed above for fixed maturity securities. Financial instruments included in other investments that are not measured at fair value on a recurring basis are policy loans, equity method investments and company owned life insurance ("COLI"). We have not attempted to determine the fair values associated with our policy loans, as we believe any differences between carrying values and the fair values are immaterial to our consolidated financial position. The fair values of our equity method investments are obtained from third parties and are determined using a variety of valuation techniques, including discounted cash flow analysis, valuation multiples analysis for comparable investments and appraisal values. As the risk spread and liquidity discount are unobservable market inputs, the fair value of our equity method investments falls within Level 3 of the fair value hierarchy. The fair value of equity method investments was \$216.8 million and \$179.7 million as of June 30, 2021 and December 31, 2020, respectively. The fair value of our COLI approximates the cash surrender value of the policies and falls within Level 2 of the fair value hierarchy. The fair value of COLI was \$377.8 million and \$373.6 million as of June 30, 2021 and December 31, 2020, respectively.

Cash and cash equivalents

Amounts reported in the consolidated balance sheets for these instruments are reported at their historical cost which approximates fair value due to the nature of the assets assigned to this category.

Policy benefit reserves, coinsurance deposits and SPIA benefit reserves

The fair values of the liabilities under contracts not involving significant mortality or morbidity risks (principally deferred annuities), are stated at the cost we would incur to extinguish the liability (i.e., the cash surrender value) as these contracts are generally issued without an annuitization date. The coinsurance deposits related to the annuity benefit reserves have fair values determined in a similar fashion. For period-certain annuity benefit contracts, the fair value is determined by discounting the benefits at the interest rates currently in effect for newly issued immediate annuity contracts. We are not required to and have not estimated the fair value of the liabilities under contracts that involve significant mortality or morbidity risks, as these liabilities fall within the definition of insurance contracts that are exceptions from financial instruments that require disclosures of fair value. Policy benefit reserves, coinsurance deposits and SPIA benefit reserves are not measured at fair value on a recurring basis. All of the fair values presented within these categories fall within Level 3 of the fair value hierarchy as most of the inputs are unobservable market data.

Notes payable

The fair values of our senior unsecured notes are based upon quoted market prices and are categorized as Level 2 within the fair value hierarchy. Notes payable are not remeasured at fair value on a recurring basis.

Subordinated debentures

Fair values for subordinated debentures are estimated using discounted cash flow calculations based principally on observable inputs including our incremental borrowing rates, which reflect our credit rating, for similar types of borrowings with maturities consistent with those remaining for the debt being valued. These fair values are categorized as Level 2 within the fair value hierarchy. Subordinated debentures are not measured at fair value on a recurring basis.

Fixed index annuities - embedded derivatives

We estimate the fair value of the embedded derivative component of our fixed index annuity policy benefit reserves at each valuation date by (i) projecting policy contract values and minimum guaranteed contract values over the expected lives of the contracts and (ii) discounting the excess of the projected contract value amounts at the applicable risk free interest rates adjusted for our nonperformance risk related to those liabilities. The projections of policy contract values are based on our best estimate assumptions for future policy growth and future policy decrements. Our best estimate assumptions for future policy growth include assumptions for the expected index credit on the next policy anniversary date which are derived from the fair values of the underlying call options purchased to fund such index credits and the expected costs of annual call options we will purchase in the future to fund index credits beyond the next policy anniversary. The projections of minimum guaranteed contract values include the same best estimate assumptions for policy decrements as were used to project policy contract values.

Within this determination we have the following significant unobservable inputs: 1) the expected cost of annual call options we will purchase in the future to fund index credits beyond the next policy anniversary and 2) our best estimates for future policy decrements, primarily lapse, partial withdrawal and mortality rates. As of both June 30, 2021 and December 31, 2020, we utilized an estimate of 2.10% for the expected cost of annual call options, which is based on estimated long-term account value growth and a historical review of our actual option costs.

Our best estimate assumptions for lapse, partial withdrawal and mortality rates are based on our actual experience and our outlook as to future expectations for such assumptions. These assumptions, which are consistent with the assumptions used in calculating deferred policy acquisition costs and deferred sales inducements, are reviewed on a quarterly basis and are updated as our experience develops and/or as future expectations change. The following table presents average lapse rate and partial withdrawal rate assumptions, by contract duration, used in estimating the fair value of the embedded derivative component of our fixed index annuity policy benefit reserves at each reporting date:

Contract Duration (Years)	Average Lapse Rates		Average Partial Withdrawal Rates	
	June 30, 2021	December 31, 2020	June 30, 2021	December 31, 2020
1 - 5	1.28%	1.22%	2.61%	2.63%
6 - 10	1.51%	1.50%	3.12%	3.14%
11 - 15	6.03%	5.66%	3.59%	3.58%
16 - 20	6.56%	7.08%	3.83%	3.79%
20+	7.72%	7.36%	3.64%	3.63%

Lapse rates are generally expected to increase as surrender charge percentages decrease. Lapse expectations reflect a significant increase in the year in which the surrender charge period on a contract ends.

The following table provides a reconciliation of the beginning and ending balances for our Level 3 assets and liabilities, which are measured at fair value on a recurring basis using significant unobservable inputs for the three and six months ended June 30, 2021 and 2020:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Fixed index annuities - embedded derivatives				
Beginning balance	\$ 7,680,951	\$ 8,451,482	\$ 7,938,281	\$ 9,624,395
Premiums less benefits	577,729	53,019	697,520	165,177
Change in fair value, net	126,084	913,984	(251,037)	(371,087)
Ending balance	<u>\$ 8,384,764</u>	<u>\$ 9,418,485</u>	<u>\$ 8,384,764</u>	<u>\$ 9,418,485</u>
Real estate investments				
Beginning balance	\$ —	\$ —	\$ —	\$ —
Purchases and sales, net	258,237	—	258,237	—
Change in fair value	—	—	—	—
Ending balance	<u>\$ 258,237</u>	<u>\$ —</u>	<u>\$ 258,237</u>	<u>\$ —</u>

The fair value of our fixed index annuities embedded derivatives is net of coinsurance ceded of \$668.5 million and \$655.3 million as of June 30, 2021 and December 31, 2020, respectively. Change in fair value, net for each period in our embedded derivatives is included in change in fair value of embedded derivatives in the unaudited consolidated statements of operations.

Certain derivatives embedded in our fixed index annuity contracts are our most significant financial instrument measured at fair value that are categorized as Level 3 in the fair value hierarchy. The contractual obligations for future annual index credits within our fixed index annuity contracts are treated as a "series of embedded derivatives" over the expected life of the applicable contracts. We estimate the fair value of these embedded derivatives at each valuation date by the method described above under **fixed index annuities - embedded derivatives**. The projections of minimum guaranteed contract values include the same best estimate assumptions for policy decrements as were used to project policy contract values.

The most sensitive assumption in determining policy liabilities for fixed index annuities is the rates used to discount the excess projected contract values. As indicated above, the discount rate reflects our nonperformance risk. If the discount rates used to discount the excess projected contract values at June 30, 2021, were to increase by 100 basis points, the fair value of the embedded derivatives would decrease by \$624.7 million recorded through operations as a decrease in the change in fair value of embedded derivatives and there would be a corresponding decrease of \$255.1 million to our combined balance for deferred policy acquisition costs and deferred sales inducements recorded through operations as an increase in amortization of deferred policy acquisition costs and deferred sales inducements. A decrease by 100 basis points in the discount rates used to discount the excess projected contract values would increase the fair value of the embedded derivatives by \$675.8 million recorded through operations as an increase in the change in fair value of embedded derivatives and there would be a corresponding increase of \$285.2 million to our combined balance for deferred policy acquisition costs and deferred sales inducements recorded through operations as a decrease in amortization of deferred policy acquisition costs and deferred sales inducements.

4. Investments

At June 30, 2021 and December 31, 2020, the amortized cost and fair value of fixed maturity securities were as follows:

	Amortized Cost (1)	Gross Unrealized Gains	Gross Unrealized Losses (2)	Allowance for Credit Losses	Fair Value
(Dollars in thousands)					
June 30, 2021					
Fixed maturity securities, available for sale:

- (1) Amortized cost excludes accrued interest receivable of \$374.1 million and \$377.5 million as of June 30, 2021 and December 31, 2020, respectively.
- (2) Gross unrealized losses are net of allowance for credit losses.

The amortized cost and fair value of fixed maturity securities at June 30, 2021, by contractual maturity are shown below. Actual maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. All of our mortgage and other asset backed securities provide for periodic payments throughout their lives and are shown below as separate lines.

	Available for sale	
	Amortized Cost	Fair Value

Deferred income tax expense	(532,011)	(579,766)
Net unrealized gains reported as accumulated other comprehensive income	<u>\$ 2,023,911</u>	<u>\$ 2,203,557</u>

The National Association of Insurance Commissioners ("NAIC") assigns designations to fixed maturity securities. These designations range from Class 1 (highest quality) to Class 6 (lowest quality). In general, securities are assigned a designation based upon the ratings they are given by the Nationally Recognized Statistical Rating Organizations ("NRSRO's"). The NAIC designations are utilized by insurers in preparing their annual statutory statements. NAIC Class 1 and 2 designations are considered "investment grade" while NAIC Class 3 through 6 designations are considered "non-investment grade." Based on the NAIC designations, we had 97% of our fixed maturity portfolio rated investment grade at both June 30, 2021 and December 31, 2020, respectively.

The following table summarizes the credit quality, as determined by NAIC designation, of our fixed maturity portfolio as of the dates indicated:

NAIC Designation	June 30, 2021		December 31, 2020	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(Dollars in thousands)

(1) Unrealized losses have not been reduced to reflect the allowance for credit losses of \$14.2 million and \$64.8 million as of June 30, 2021 and December 31, 2020, respectively.

The unrealized losses at June 30, 2021 are principally related to the timing of the purchases of certain securities, which carry less yield than those available at June 30, 2021, and the continued impact the COVID-19 pandemic had on credit markets. Approximately 82% and 75% of the unrealized losses on fixed maturity securities shown in the above table for June 30, 2021 and December 31, 2020, respectively, are on securities that are rated investment grade, defined as being the highest two NAIC designations.

We expect to recover our amortized cost on all securities except for those securities on which we recognized an allowance for credit loss. In addition, because we did not have the intent to sell fixed maturity securities with unrealized losses and it was not more likely than not that we would be required to sell these securities prior to recovery of the amortized cost, which may be maturity, we did not write down these investments to fair value through operations.

Changes in net unrealized gains/losses on investments for the three and six months ended June 30, 2021 and 2020 are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Fixed maturity securities available for sale carried at fair value	\$ 1,186,175	\$ 3,347,516	\$ (475,186)	\$ 485,108
Adjustment for effect on other balance sheet accounts:				
Deferred policy acquisition costs, deferred sales inducements and policy benefit reserves	(529,656)	(1,599,842)	247,785	(202,644)
Deferred income tax asset/liability	(137,868)	(367,014)	47,755	(59,319)
	(667,524)	(1,966,856)	295,540	(261,963)
Change in net unrealized gains/losses on investments carried at fair value	\$ 518,651	\$ 1,380,660	\$ (179,646)	\$ 223,145

Proceeds from sales of available for sale fixed maturity securities for the six months ended June 30, 2021 and 2020 were \$420.4 million and \$973.4 million, respectively. Scheduled principal repayments, calls and tenders for available for sale fixed maturity securities for the six months ended June 30, 2021 and 2020 were \$2.1 billion and \$1.4 billion, respectively.

Net realized losses on investments for the three and six months ended June 30, 2021 and 2020, are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Available for sale fixed maturity securities:

	\$ (3,114)	\$ (25,888)	\$ (7,697)	\$ (46,224)

Realized losses on available for sale fixed maturity securities in 2021 and 2020 were realized primarily due to strategies to reposition the fixed maturity security portfolio that result in improved net investment income, credit risk or duration profiles as they pertain to our asset liability management. In addition, certain realized gains and losses on available for sale fixed maturity securities in 2020 were realized as a result of efforts to de-risk the portfolio. Realized gains and losses on sales are determined on the basis of specific identification of investments based on the trade date.

We review and analyze all investments on an ongoing basis for changes in market interest rates and credit deterioration. This review process includes analyzing our ability to recover the amortized cost basis of each investment that has a fair value that is materially lower than its amortized cost and requires a high degree of management judgment and involves uncertainty. The evaluation of securities for credit loss is a quantitative and qualitative process, which is subject to risks and uncertainties.

We have a policy and process to identify securities that could potentially have credit loss. This process involves monitoring market events and other items that could impact issuers. The evaluation includes but is not limited to such factors as:

- the extent to which the fair value has been less than amortized cost or cost;
- whether the issuer is current on all payments and all contractual payments have been made as agreed;
- the remaining payment terms and the financial condition and near-term prospects of the issuer;
- the lack of ability to refinance due to liquidity problems in the credit market;
- the fair value of any underlying collateral;
- the existence of any credit protection available;
- our intent to sell and whether it is more likely than not we would be required to sell prior to recovery for debt securities;
- consideration of rating agency actions; and
- changes in estimated cash flows of mortgage and asset backed securities.

We determine whether an allowance for credit loss should be established for debt securities by assessing all facts and circumstances surrounding each security. Where the decline in fair value of debt securities is attributable to changes in market interest rates or to factors such as market volatility, liquidity and spread widening, and we anticipate recovery of all contractual or expected cash flows, we do not consider these investments to have credit loss because we do not intend to sell these investments and it is not more likely than not we will be required to sell these investments before a recovery of amortized cost, which may be maturity.

If we intend to sell a debt security or if it is more likely than not that we will be required to sell a debt security before recovery of its amortized cost basis, credit loss has occurred and the difference between amortized cost and fair value will be recognized as a loss in operations.

If we do not intend to sell and it is not more likely than not we will be required to sell the debt security but also do not expect to recover the entire amortized cost basis of the security, a credit loss would be recognized in operations for the amount of the expected credit loss. We determine the amount of expected credit loss by calculating the present value of the cash flows expected to be collected discounted at each security's acquisition yield based on our consideration of whether the security was of high credit quality at the time of acquisition. The difference between the present value of expected future cash flows and the amortized cost basis of the security is the amount of credit loss recognized in operations. The recognized credit loss is limited to the total unrealized loss on the security (i.e., the fair value floor).

The determination of the credit loss component of a mortgage backed security is based on a number of factors. The primary consideration in this evaluation process is the issuer's ability to meet current and future interest and principal payments as contractually stated at time of purchase. Our review of these securities includes an analysis of the cash flow modeling under various default scenarios considering independent third party benchmarks, the seniority of the specific tranche within the structure of the security, the composition of the collateral and the actual default, loss severity and prepayment experience exhibited. With the input of third party assumptions for default projections, loss severity and prepayment expectations, we evaluate the cash flow projections to determine whether the security is performing in accordance with its contractual obligation.

We utilize models from a leading structured product software specialist serving institutional investors. These models incorporate each security's seniority and cash flow structure. In circumstances where the analysis implies a potential for principal loss at some point in the future, we use the "best estimate" cash flow projection discounted at the security's effective yield at acquisition to determine the amount of our potential credit loss associated with this security. The discounted expected future cash flows equates to our expected recovery value. Any shortfall of the expected recovery when compared to the amortized cost of the security will be recorded as credit loss.

The determination of the credit loss component of a corporate bond is based on the underlying financial performance of the issuer and their ability to meet their contractual obligations. Considerations in our evaluation include, but are not limited to, credit rating changes, financial statement and ratio analysis, changes in management, significant changes in credit spreads, breaches of financial covenants and a review of the economic outlook for the industry and markets in which they trade. In circumstances where an issuer appears unlikely to meet its future obligation, an estimate of credit loss is determined. Credit loss is calculated using default probabilities as derived from the credit default swaps markets in conjunction with recovery rates derived from independent third party analysis or a best estimate of credit loss. This credit loss rate is then incorporated into a present value calculation based on an expected principal loss in the future discounted at the yield at the date of purchase and compared to amortized cost to determine the amount of credit loss associated with the security.

We do not measure a credit loss allowance on accrued interest receivable as we write off any accrued interest receivable balance to net investment income in a timely manner when we have concerns regarding collectability.

Amounts on available for sale fixed maturities that are deemed to be uncollectible are written off and removed from the allowance for credit loss. A write-off may also occur if we intend to sell a security or when it is more likely than not we will be required to sell the security before the recovery of its amortized cost.

The following table provides a rollforward of the allowance for credit loss:

5. Mortgage Loans on Real Estate

Our financing receivables consist of the following three portfolio segments: commercial mortgage loans, agricultural mortgage loans and residential mortgage loans. Our mortgage loan portfolios are summarized in the following table. There were commitments outstanding of \$177.6 million at June 30, 2021.

	June 30, 2021	December 31, 2020
	(Dollars in thousands)	
Commercial mortgage loans:		
Principal outstanding	\$ 3,459,879	\$ 3,580,154
Deferred fees and costs, net	(1,409)	(1,266)
Amortized cost	3,458,470	3,578,888
Valuation allowance	(22,498)	(25,529)
Commercial mortgage loans, carrying value	3,435,972	3,553,359
Agricultural mortgage loans:		
Principal outstanding	277,427	245,807
Deferred fees and costs, net	(708)	(634)

Valuation allowance	(454)	(2,130)
Agricultural mortgage loans, carrying value	276,265	243,043
Residential mortgage loans:		
Principal outstanding	573,638	366,320
Deferred fees and costs, net	1,487	925
Unamortized discounts and premiums, net	16,212	5,212
Amortized cost	591,337	372,457
Valuation allowance	(3,629)	(3,370)
Residential mortgage loans, carrying value	587,708	369,087
Mortgage loans, carrying value	\$ 4,299,945	\$ 4,165,489

Our commercial mortgage loan portfolio consists of loans collateralized by the related properties and diversified as to property type, location and loan size. Our lending policies establish limits on the amount that can be loaned to one borrower and other criteria to attempt to reduce the risk of default. The commercial mortgage loan portfolio is summarized by geographic region and property type as follows:

	June 30, 2021		December 31, 2020	
	Principal	Percent	Principal	Percent
	(Dollars in thousands)			
Geographic distribution				
East	\$ 676,448	19.6 %	\$ 699,741	19.5 %
Middle Atlantic	294,619	8.5 %	281,971	7.9 %
Mountain	373,129	10.8 %	391,025	10.9 %
New England	24,475	0.7 %	24,774	0.7 %

Apartment	948,161	27.4 %	939,084	26.2 %
Mixed use/Other	173,363	5.0 %	206,612	5.8 %
	\$ 3,459,879	100.0 %	\$ 3,580,154	100.0 %

Our agricultural mortgage loan portfolio consists of loans with an outstanding principal balance of \$277.4 million and \$245.8 million as of June 30, 2021 and December 31, 2020, respectively. These loans are collateralized by agricultural land and are diversified as to location within the United States. Our residential mortgage loan portfolio consists of loans with an outstanding principal balance of \$573.6 million and \$366.3 million as of June 30, 2021 and December 31, 2020, respectively. These loans are collateralized by the related properties and diversified as to location within the United States.

Mortgage loans on real estate are generally reported at cost adjusted for amortization of premiums and accrual of discounts, computed using the interest method and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on the loan's contractual interest rate. Interest income is included in Net investment income on our consolidated statements of operations. Accrued interest receivable, which was \$20.6 million and \$16.6 million as of June 30, 2021 and December 31, 2020, respectively, is included in Accrued investment income on our consolidated balance sheets.

Loan Valuation Allowance

We establish a valuation allowance to provide for the risk of credit losses inherent in our mortgage loan portfolios. The valuation allowance is maintained at a level believed adequate by management to absorb estimated expected credit losses. The valuation allowance is based on amortized cost, which excludes accrued interest receivable. We do not measure a credit loss allowance on accrued interest receivable as we write off any uncollectible accrued interest receivable balances to net investment income in a timely manner. We did not charge off any uncollectible accrued interest receivable on our commercial, agricultural or residential mortgage loan portfolios for the three and six month periods ended June 30, 2021.

The valuation allowances for each of our mortgage loan portfolios are estimated by deriving probability of default and recovery rate assumptions based on the characteristics of the loans in each portfolio, historical economic data and loss information, and current and forecasted economics conditions. Key loan characteristics impacting the estimate for our commercial mortgage loan portfolio include the current state of the borrower's credit quality, which considers factors such as loan-to-value ("LTV") and debt service coverage ("DSC") ratios, loan performance, underlying collateral type, delinquency status, time to maturity, and original credit scores. Key loan characteristics impacting the estimate for our agricultural and residential mortgage loan portfolios include delinquency status, time to maturity, original credit scores and LTV ratios.

The following table represents a rollforward of the valuation allowance on our mortgage loan portfolios:

	Three Months Ended June 30, 2021			
	Commercial	Agricultural	Residential	Total
	(Dollars in thousands)			
Beginning allowance balance	\$ (26,139)	\$ (439)	\$ (1,936)	\$ (28,514)

Ending allowance balance	<u>\$ (22,498)</u>	<u>\$ (454)</u>	<u>\$ (3,629)</u>	<u>\$ (26,581)</u>

	Six Months Ended June 30, 2020			
	Commercial	Agricultural	Residential	Total
	(Dollars in thousands)			
Beginning allowance balance	\$ (17,579)	\$ (200)	\$ —	\$ (17,779)
Charge-offs	1,485	—	—	1,485
Recoveries	712	—	—	712
Change in provision for credit losses	(2,737)	(120)	(1,650)	(4,507)
Ending allowance balance	<u>\$ (18,119)</u>	<u>\$ (320)</u>	<u>\$ (1,650)</u>	<u>\$ (20,089)</u>

Charge-offs include allowances that have been established on loans that were satisfied either by taking ownership of the collateral or by some other means such as discounted pay-off or loan sale. When ownership of the property is taken it is recorded at the lower of the loan's carrying value or the property's fair value (based on appraised values) less estimated costs to sell. The real estate owned is recorded as a component of Other investments and the loan is recorded as fully paid, with any allowance for credit loss that has been established charged off. Fair value of the real estate is determined by third party appraisal. Recoveries are situations where we have received a payment from the borrower in an amount greater than the carrying value of the loan (principal outstanding less specific allowance).

Credit Quality Indicators

We evaluate the credit quality of our commercial and agricultural mortgage loans by analyzing LTV and DSC ratios and loan performance. We evaluate the credit quality of our residential mortgage loans by analyzing loan performance.

LTV and DSC ratios for our commercial mortgage loans are originally calculated at the time of loan origination and are updated annually for each loan using information such as rent rolls, assessment of lease maturity dates and property operating statements, which are reviewed in the context of current leasing and in place rents compared to market leasing and market rents. A DSC ratio of less than 1.0 indicates that a property's operations do not generate sufficient income to cover debt payments. An LTV ratio in excess of 100% indicates the unpaid loan amount exceeds the value of the underlying collateral. All of our commercial mortgage loans that have a debt service coverage ratio of less than 1.0 are performing under the original contractual loan terms at June 30, 2021 and December 31, 2020.

The amortized cost of our commercial mortgage loan portfolio by LTV and DSC ratios based on the most recent information collected was as follows at June 30, 2021 and December 31, 2020 (by year of origination):

	2021		2020		2019		2018		2017		Prior		Total

LTV and DSC ratios for our agricultural mortgage loans are calculated at the time of loan origination and are evaluated annually for each loan using land value averages. A DSC ratio of less than 1.0 indicates that a property's operations do not generate sufficient income to cover debt payments. An LTV ratio in excess of 100% indicates the unpaid loan amount exceeds the value of the underlying collateral. All of our agricultural mortgage loans that have a debt service coverage ratio of less than 1.0 are performing under the original contractual loan terms at June 30, 2021 and December 31, 2020.

The amortized cost of our agricultural mortgage loan portfolio by LTV and DSC ratios based on the most recent information collected was as follows at June 30, 2021 and December 31, 2020 (by year of origination):

Total residential mortgage loans	\$ 347,207	\$ 25,250	\$ —	\$ —	\$ —	\$ —	\$ 372,457

Commercial, agricultural and residential mortgage loans are considered delinquent when they become 60 days or more past due. When loans become more than 90 days past due they are considered nonperforming and we place them on non-accrual status and discontinue recognizing interest income. If payments are received on a delinquent loan, interest income is recognized to the extent it would have been recognized if normal principal and interest would have been received timely. If payments are received to bring a delinquent loan back to current, we will resume accruing interest income on that loan. There were ten loans in non-accrual status at June 30, 2021 and one loan in non-accrual status at December 31, 2020. We recognized no interest income on loans in non-accrual status during the three and six months ended June 30, 2021 and 2020.

Troubled Debt Restructuring

A Troubled Debt Restructuring ("TDR") is a situation where we have granted a concession to a borrower for economic or legal reasons related to the borrower's financial difficulties that we would not otherwise consider. A mortgage loan that has been granted new terms, including workout terms as described previously, would be considered a TDR if it meets conditions that would indicate a borrower is experiencing financial difficulty and the new terms constitute a concession on our part. We analyze all loans where we have agreed to workout terms and all loans that we have refinanced to determine if they meet the definition of a TDR. We consider the following factors in determining whether or not a borrower is experiencing financial difficulty:

- borrower is in default,
- borrower has declared bankruptcy,
- there is growing concern about the borrower's ability to continue as a going concern,
- borrower has insufficient cash flows to service debt,
- borrower's inability to obtain funds from other sources, and
- there is a breach of financial covenants by the borrower.

If the borrower is determined to be in financial difficulty, we consider the following conditions to determine if the borrower is granted a concession:

- assets used to satisfy debt are less than our recorded investment,
- interest rate is modified,
- maturity date extension at an interest rate less than market rate,
- capitalization of interest,
- delaying principal and/or interest for a period of three months or more, and
- partial forgiveness of the balance or charge-off.

Mortgage loan workouts, refinances or restructures that are classified as TDRs are individually evaluated and measured for impairment. There were no mortgage loans that we determined to be a TDR at June 30, 2021 and December 31, 2020.

6. Variable Interest Entities

We have relationships with various types of entities which may be VIEs. One VIE is consolidated in our financial results. See Note 1, Significant Accounting Policies for further details on our consolidation accounting policies. As of June 30, 2021, we invested in one investment company real estate limited partnership which owns various limited liability companies that invest in residential real estate properties. This entity is a VIE as the legal entity's equity investors have insufficient equity at risk and lack of power to direct the activities that most significantly impact the economic performance. We determined we are the primary beneficiary as a result of our power to control the entity through our significant ownership. Due to the nature of these real estate investments, the investment balance will fluctuate based on changes in the fair value of the properties as well as when purchases and sales of properties are made.

The carrying amounts of our consolidated VIE assets, which can only be used to settle obligations of the consolidated VIE, were \$284.8 million as of June 30, 2021. The carrying amounts of our consolidated VIE liabilities for which creditors do not have recourse were \$16.4 million as of June 30, 2021.

7. Derivative Instruments

None of our derivatives qualify for hedge accounting, thus, any change in the fair value of the derivatives is recognized immediately in the consolidated statements of operations. The fair value of our derivative instruments, including derivative instruments embedded in fixed index annuity contracts, presented in the consolidated balance sheets are as follows:

	June 30, 2021	December 31, 2020
	(Dollars in thousands)	
Assets		
Derivative instruments		
Call options	\$ 1,459,754	\$ 1,310,954
Warrants	211	—
	<u>\$ 1,459,965</u>	<u>\$ 1,310,954</u>
Liabilities		
Policy benefit reserves - annuity products		
Fixed index annuities - embedded derivatives, net	\$ 8,384,764	\$ 7,938,281

The changes in fair value of derivatives included in the unaudited consolidated statements of operations are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Change in fair value of derivatives:				
Call options	\$ 500,793	\$ 327,662	\$ 897,069	\$ (614,274)
Warrants	87	—	116	—
Interest rate caps	—	—	—	62
	<u>\$ 500,880</u>	<u>\$ 327,662</u>	<u>\$ 897,185</u>	<u>\$ (614,212)</u>
Change in fair value of embedded derivatives:				
Fixed index annuities - embedded derivatives	\$ 126,084	\$ 913,984	\$ (251,037)	\$ (371,087)
Other changes in difference between policy benefit reserves computed using derivative accounting vs. long-duration contracts accounting	147,629	212,951	242,337	247,961
	<u>\$ 273,713</u>	<u>\$ 1,126,935</u>	<u>\$ (8,700)</u>	<u>\$ (123,126)</u>

The amounts presented as "Other changes in difference between policy benefit reserves computed using derivative accounting vs. long-duration contracts accounting" represents the total change in the difference between policy benefit reserves for fixed index annuities computed under the derivative accounting standard and the long-duration contracts accounting standard at each balance sheet date, less the change in fair value of our fixed index annuities embedded derivatives that is presented as Level 3 liabilities in Note 3.

We have fixed index annuity products that guarantee the return of principal to the policyholder and credit interest based on a percentage of the gain in a specified market index. When fixed index annuity deposits are received, a portion of the deposit is used to purchase derivatives consisting of call options on the applicable market indices to fund the index credits due to fixed index annuity policyholders. Substantially all such call options are one year options purchased to match the funding requirements of the underlying policies. The call options are marked to fair value with the change in fair value included as a component of revenues. The change in fair value of derivatives includes the gains or losses recognized at the expiration of the option term and the changes in fair value for open positions. On the respective anniversary dates of the index policies, the index used to compute the index credit is reset and we purchase new call options to fund the next index credit. We manage the cost of these purchases through the terms of our fixed index annuities, which permit us to change caps, participation rates, and/or asset fees, subject to guaranteed minimums on each policy's anniversary date. By adjusting caps, participation rates, or asset fees, we can generally manage option costs except in cases where the contractual features would prevent further modifications.

Our strategy attempts to mitigate any potential risk of loss due to the nonperformance of the counterparties to these call options through a regular monitoring process which evaluates the program's effectiveness. We do not purchase call options that would require payment or collateral to another institution and our call options do not contain counterparty credit-risk-related contingent features. We are exposed to risk of loss in the event of nonperformance by the counterparties and, accordingly, we purchase our option contracts from multiple counterparties and evaluate the creditworthiness of all counterparties prior to purchase of the contracts. All non-exchange traded options have been purchased from nationally recognized financial institutions with a Standard and Poor's credit rating of A- or higher at the time of purchase and the maximum credit exposure to any single counterparty is subject to concentration limits. We also have credit support agreements that allow us to request the counterparty to provide collateral to us when the fair value of our exposure to the counterparty exceeds specified amounts.

The notional amount and fair value of our call options by counterparty and each counterparty's current credit rating are as follows:

Counterparty	Credit Rating (S&P)	Credit Rating (Moody's)	June 30, 2021		December 31, 2020	
			Notional Amount	Fair Value	Notional Amount	Fair Value
			(Dollars in thousands)

Exchange traded			272,039	7,563	214,819	4,999
			\$ 39,073,075	\$ 1,459,754	\$ 39,362,179	\$ 1,310,954

As of June 30, 2021 and December 31, 2020, we held \$1.4 billion and \$1.3 billion, respectively, of cash and cash equivalents and other investments from counterparties for derivative collateral, which is included in Other liabilities on our consolidated balance sheets. This derivative collateral limits the maximum amount of economic loss due to credit risk that we would incur if parties to the call options failed completely to perform according to the terms of the contracts to \$31.5 million and \$35.1 million at June 30, 2021 and December 31, 2020, respectively.

The future index credits on our fixed index annuities are treated as a "series of embedded derivatives" over the expected life of the applicable contract. We do not purchase call options to fund the index liabilities which may arise after the next policy anniversary date. We must value both the call options and the related forward embedded options in the policies at fair value.

We entered into an interest rate swap and interest rate caps to manage interest rate risk associated with the floating rate component on certain of our subordinated debentures. See Note 10 in our Annual Report on Form 10-K for the year ended December 31, 2020 for more information on our subordinated debentures. As of June 30, 2021, all of our floating rate subordinated debentures have been redeemed and the interest rate swap and interest rate caps have been terminated. The terms of the interest rate swap provided that we paid a fixed rate of interest and received a floating rate of interest. The terms of the interest rate caps limited the three month LIBOR to 2.50%. The interest rate swap and caps were not effective hedges under accounting guidance for derivative instruments and hedging activities. Therefore, we recorded the interest rate swap and caps at fair value and any net cash payments received or paid were included in the change in fair value of derivatives in the unaudited consolidated statements of operations.

8. Notes Payable and Amounts Due Under Repurchase Agreements

Notes payable includes the following:

	June 30, 2021	December 31, 2020
	(Dollars in thousands)	
Senior notes due 2027		
Principal	\$ 500,000	\$ 500,000
Unamortized debt issue costs	(3,815)	(4,086)
Unamortized discount	(230)	(246)
	<u>\$ 495,955</u>	<u>\$ 495,668</u>

On June 16, 2017, we issued \$500 million aggregate principal amount of senior unsecured notes due 2027 which bear interest at 5.0% per year and will mature on June 15, 2027 (the "2027 Notes"). The 2027 Notes were issued at a \$0.3 million discount, which is being amortized over the term of the 2027 Notes using the effective interest method. Contractual interest is payable semi-annually in arrears each June 15th and December 15th. The initial transaction fees and costs totaling \$5.8 million were capitalized as deferred financing costs and are being amortized over the term of the 2027 Notes using the effective interest method.

As part of our investment strategy, we enter into securities repurchase agreements (short-term collateralized borrowings). When we do borrow cash on these repurchase agreements, we pledge collateral in the form of debt securities with fair values approximately equal to the amount due and we use the cash to purchase debt securities ahead of the time we collect the cash from selling annuity policies to avoid a lag between the investment of funds and the obligation to credit interest to policyholders. We earn investment income on the securities purchased with these borrowings at a rate in excess of the cost of these borrowings. Such borrowings averaged \$32.8 million and \$28.7 million during the three and six months ended June 30, 2020, respectively. We had no borrowings under repurchase agreements during the three and six months ended June 30, 2021. The maximum amount borrowed was \$186.4 million during the six months ended June 30, 2020. The weighted average interest rate on amounts due under repurchase agreements was 1.89% and 1.73% for the three and six months ended June 30, 2020, respectively.

9. Commitments and Contingencies

We are occasionally involved in litigation, both as a defendant and as a plaintiff. In addition, state and federal regulatory bodies, such as state insurance departments, the Securities and Exchange Commission ("SEC") and the Department of Labor, regularly make inquiries and conduct examinations or investigations concerning our compliance with, among other things, insurance laws, securities laws and the Employee Retirement Income Security Act of 1974, as amended.

In accordance with applicable accounting guidelines, we establish an accrued liability for litigation and regulatory matters when those matters present loss contingencies that are both probable and estimable. As a litigation or regulatory matter is developing we, in conjunction with outside counsel, evaluate on an ongoing basis whether the matter presents a loss contingency that meets conditions indicating the need for accrual and/or disclosure, and if not, the matter will continue to be monitored for further developments. If and when the loss contingency related to litigation or regulatory matters is deemed to be both probable and estimable, we will establish an accrued liability with respect to that matter and will continue to monitor the matter for further developments that may affect the amount of the accrued liability.

There can be no assurance that any pending or future litigation will not have a material adverse effect on our business, financial condition, or results of operations.

In addition to our commitments to fund mortgage loans, we have unfunded commitments at June 30, 2021 to limited partnerships of \$39.6 million and to fixed maturity securities of \$1.0 million.

10. Earnings (Loss) Per Common Share and Stockholders' Equity

Earnings (Loss) Per Common Share

The following table sets forth the computation of earnings (loss) per common share and earnings (loss) per common share - assuming dilution:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands, except per share data)				
Numerator:				
Net income (loss) available to common stockholders - numerator for earnings (loss) per common share	\$ (65,613)	\$ (253,379)	\$ 206,152	\$ (17,043)
Denominator:				
Weighted average common shares outstanding	94,800,734	91,803,312	95,265,212	91,723,814
Effect of dilutive securities:				
Stock options and deferred compensation agreements	255,426	63,265	218,240	100,277
Restricted stock and restricted stock units	322,503	160,276	311,132	199,875
Denominator for earnings (loss) per common share - assuming dilution	95,378,663	92,026,853	95,794,584	92,023,966
Earnings (loss) per common share	\$ (0.69)	\$ (2.76)	\$ 2.16	\$ (0.19)
Earnings (loss) per common share - assuming dilution	\$ (0.69)	\$ (2.76)	\$ 2.15	\$ (0.19)

During the three and six months ended June 30, 2021, there were 182,689 options to purchase shares of our common stock outstanding, with an exercise price of \$31.63 - \$32.58, excluded from the computation of diluted earnings (loss) per common share. During the three months ended June 30, 2020, there were 519,285 options to purchase shares of our common stock outstanding, with an exercise price of \$24.79 - \$26.70, excluded from the computation of diluted loss per common share. During the six months ended June 30, 2020, there were 50,000 options to purchase shares of our common stock outstanding, with an exercise price of \$26.70, excluded from the computation of diluted loss per share.

Stockholders' Equity

On June 10, 2020, we issued 12,000 shares of 6.625% Fixed-Rate Reset Non-Cumulative Preferred Stock, Series B ("Series B") with a \$1.00 par value per share and a liquidation preference of \$25,000 per share, for aggregate net proceeds of \$290.3 million.

On November 21, 2019 we issued 16,000 shares of 5.95% Fixed-Rate Reset Non-Cumulative Preferred Stock, Series A ("Series A") with a \$1.00 par value per share and a liquidation preference of \$25,000 per share, for aggregate net proceeds of \$388.9 million.

Dividends on the Series A and Series B preferred stock are payable on a non-cumulative basis only when, as and if declared, quarterly in arrears on the first day of March, June, September and December of each year, commencing on March 1, 2020 for Series A and on December 1, 2020 for Series B. For the three and six months ended June 30, 2021, we paid dividends totaling \$6.0 million and \$11.9 million on the Series A preferred stock and \$4.9 million and \$9.9 million on the Series B preferred stock, respectively. For the three and six months ended June 30, 2020, we paid dividends totaling \$6.0 million and \$12.6 million on the Series A preferred stock, respectively. The Series A and Series B preferred stock rank senior to our common stock with respect to dividends, to the extent declared, and in liquidation, to the extent of the liquidation preference. The Series A and Series B preferred stock are not subject to any mandatory redemption, sinking fund, retirement fund, purchase fund or similar provisions.

Brookfield Asset Management Equity Investment

On October 18, 2020, we announced an agreement with Brookfield Asset Management, Inc. and its affiliated entities (collectively, "Brookfield") under which Brookfield will acquire up to a 19.9% ownership interest of common stock in the Company. The equity investment by Brookfield will take place in two stages: an initial purchase of a 9.9% equity interest at \$37.00 per share which closed on November 30, 2020 with Brookfield purchasing 9,106,042 shares, and a second purchase of up to an incremental 10.0% equity interest, at the greater value of \$37.00 per share or adjusted book value per share (excluding AOCI and the net impact of fair value accounting for derivatives and embedded derivatives). The second equity investment is subject to finalization of a proposed reinsurance transaction that has been agreed to in principle, receipt of applicable regulatory approvals and other closing conditions. Brookfield also received one seat on the Company's Board of Directors following the initial equity investment.

Share Repurchase Program

On October 18, 2020, the Company's Board of Directors approved a \$500 million share repurchase program. The purpose of the share repurchase program is to both offset dilution from the issuance of shares to Brookfield and to institute a regular cash return program for shareholders. We started the buyback program on October 30, 2020 and have repurchased 5.0 million shares of our common stock for \$148.1 million in the open market as of June 30, 2021.

On November 30, 2020 we entered into an accelerated share repurchase (ASR) agreement with Citibank, N.A. to repurchase an aggregate of \$115 million of our common stock. Under the ASR agreement, we received an initial share delivery of approximately 3.5 million shares. The final settlement of 0.5 million shares, which was based on the volume-weighted average price of our common stock during the term of the transaction, less a discount and subject to customary adjustments, was delivered on February 25, 2021. The average price paid for shares repurchased under the ASR was \$28.45 per common share. The ASR agreement was determined to be an equity contract.

As of June 30, 2021, we have repurchased approximately 9.1 million shares of our common stock at an average price of \$29.02 per common share.

Treasury Stock

As of June 30, 2021, we held 9,895,711 shares of treasury stock with a carrying value of \$259.3 million. As of December 31, 2020, we held 6,516,525 shares of treasury stock with a carrying value of \$151.6 million.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion and analysis reviews our unaudited consolidated financial position at June 30, 2021, and the unaudited consolidated results of operations for the three and six month periods ended June 30, 2021 and 2020, and where appropriate, factors that may affect future financial performance. This analysis should be read in conjunction with our unaudited consolidated financial statements and notes thereto appearing elsewhere in this Form 10-Q, and the audited consolidated financial statements, notes thereto and selected consolidated financial data appearing in our Annual Report on Form 10-K for the year ended December 31, 2020. Interim operating results for the three and six months ended June 30, 2021 are not necessarily indicative of the results expected for the entire year. Preparation of financial statements requires use of management estimates and assumptions.

Cautionary Statement Regarding Forward-Looking Information

All statements, trend analysis and other information contained in this report and elsewhere (such as in filings by us with the SEC, press releases, presentations by us or management or oral statements) may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended. Forward-looking statements give expectations or forecasts of future events and do not relate strictly to historical or current facts. They may relate to markets for our products, trends in our operations or financial results, strategic alternatives, future operations, strategies, plans, partnerships, investments, share buybacks and other financial developments. They use words and terms such as accelerate, anticipate, believe, can, could, enable, estimate, evolve, expect, improve, intend, look forward, may, migrating, model, objective, opportunity, outlook, plan, potential, project, seek, should, strategy, sustainable, target, will, would, and other words and terms of similar meaning or that are otherwise tied to future periods or future performance, in each case in all forms of speech and derivative forms, or similar words, as well as any projections of future events or results. Forward-looking statements, by their nature, are subject to a variety of assumptions, risks, and uncertainties that could cause actual results to differ materially from the results projected. Many of these risks and uncertainties cannot be controlled by the Company. Factors that may cause our actual decisions or results to differ materially from those contemplated by these forward-looking statements include, among other things:

- general economic conditions and other factors, including prevailing interest rate levels and stock and credit market performance which may affect (among other things) our ability to sell our products, our ability to access capital resources and the costs associated therewith, the fair value of our investments, which could result in credit losses, and certain liabilities, and the lapse rate and profitability of policies;
- major public health issues, and specifically the COVID-19 pandemic and the resulting impacts on economic conditions and financial markets;
- customer response to new products and marketing initiatives;
- changes in Federal income tax laws and regulations which may affect the relative income tax advantages of our products;
- increasing competition in the sale of fixed annuities;
- regulatory changes or actions, including those relating to regulation of financial services affecting (among other things) bank sales and underwriting of insurance products and regulation of the sale, underwriting and pricing of products; and
- the risk factors or uncertainties listed from time to time in our filings with the SEC.

For a detailed discussion of these and other factors that might affect our performance, see Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2020. Forward-looking statements speak only as of the date the statement was made and the Company undertakes no obligation to update such forward-looking statements. There can be no assurance that other factors not currently disclosed or anticipated by the Company will not materially adversely affect our results of operations or plans. Investors are cautioned not to place undue reliance on any forward-looking statements made by us or on our behalf.

Our Business and Profitability

We specialize in the sale of individual annuities (primarily fixed and fixed index deferred annuities) through independent marketing organizations ("IMOs"), agents, banks and broker-dealers. Fixed and fixed index annuities are an important product for Americans looking to fund their retirement needs as annuities have the ability to provide retirees a paycheck for life.

Under U.S. GAAP, premium collections for deferred annuities are reported as deposit liabilities instead of as revenues. Similarly, cash payments to policyholders are reported as decreases in the liabilities for policyholder account balances and not as expenses. Sources of revenues for products accounted for as deposit liabilities are net investment income, surrender charges assessed against policy withdrawals and fees deducted from policyholder account balances for lifetime income benefit riders, net realized gains (losses) on investments and changes in fair value of derivatives. Components of expenses for products accounted for as deposit liabilities are interest sensitive and index product benefits (primarily interest credited to account balances and changes in the liability for lifetime income benefit riders), changes in fair value of embedded derivatives, amortization of deferred sales inducements and deferred policy acquisition costs, other operating costs and expenses and income taxes.

Our profitability depends in large part upon:

- the amount of assets under our management,
- investment spreads we earn on our policyholder account balances,
- our ability to manage our investment portfolio to maximize returns and minimize risks such as interest rate changes and defaults or credit losses,
- our ability to appropriately price for lifetime income benefit riders offered on certain of our fixed rate and fixed index annuity policies,
- our ability to manage interest rates credited to policyholders and costs of the options purchased to fund the annual index credits on our fixed index annuities,
- our ability to manage the costs of acquiring new business (principally commissions paid to agents and distribution partners and bonuses credited to policyholders),
- our ability to manage our operating expenses, and
- income taxes.

We are implementing an updated strategy, referred to as AEL 2.0, after having undertaken a thorough review of our business in 2020. AEL 2.0 is designed to capitalize on the scarcity value of our annuity origination and couple it with an “open architecture” investment management platform for investing the annuity assets. Our approach to investment management is to partner with best in class investment management firms across a wide array of asset classes and capture part of the asset management value chain economics for our shareholders. This will enable AEL to operate at the intersection of both asset management and insurance. Our updated strategy focuses on four key pillars: Go-to-Market, Investment Management, Capital Structure and Foundational Capabilities.

The Go-to-Market pillar focuses on how we generate long-term client assets, referred to as policyholder funds under management, through annuity product sales. We consider our marketing capabilities and franchise to be one of our core competitive strengths. The liabilities we expect to originate will result in stable, long-term attractive funding, which we will invest to earn a spread and return over the prudent level of risk capital. American Equity Life has become one of the leading insurance companies in the IMO distribution channel over our 25-year history and can tap into a core set of loyal independent producers to originate new annuity product sales. We are focused on growing our loyal producers with one million dollars or greater of annuity product sales each year. We plan to increase our share of annuity product sales generated by IMOs and accelerate our expansion into bank, broker dealer and registered investment advisor distribution through our subsidiary, Eagle Life Insurance Company. Our strategy is to improve sales execution and enhance producer loyalty with product solutions, focused marketing campaigns, distribution analytics to enhance both sales productivity and producer engagement and new client engagement models that complement traditional physical face-to-face interactions.

The Investment Management pillar will enable the return on assets to generate adequate spread income. In an environment where risk free rates are approximately one percent, insurers need to invest for better risk-adjusted yields than what are available in traditional fixed income securities. Our investment strategy is to look for opportunities to invest in alpha-producing specialty sub-sectors like middle market credit and sectors with contractually strong cash flows like real estate and infrastructure. Our investment management strategy includes forming partnerships with certain asset managers that will provide access to specific asset sectors, resulting in a sustainable supply of quality private investments, in addition to traditional fixed income securities. The partnerships with asset managers may include us taking an equity interest in the asset manager to create greater alignment or forming an alternate economic sharing arrangement so we benefit as our partners scale their platforms with third party assets under management.

The Capital Structure pillar is focused on greater use of reinsurance structuring to both optimize asset allocation for our balance sheet and enable American Equity Life to free up capital and become a capital-light company over time. We are working diligently to complete in 2021 the announced reinsurance relationships with Brookfield Asset Management Inc. and its affiliated entities (collectively, "Brookfield") and the formation of our own reinsurance platform, as well as working on other potential reinsurance arrangements. These transactions will enable us to achieve three business outcomes over time: first, free up capital to potentially return to shareholders, second, redeploy capital into higher yielding alpha generating assets to grow investment income relative to new money yields in a traditional core fixed income portfolio and third, successfully demonstrating the first two outcomes will allow us to raise third-party capital into reinsurance vehicles ("side-cars") to provide risk capital to back a portion of our existing liabilities and future sales of annuity products. This will enable us to convert from an investment spread business with our own capital at risk into a combination spread based and fee based business with externally sourced risk capital. In combination, we expect these three outcomes to generate sustained, deployable capital for shareholders and significant accretion in return on equity ("ROE") over time.

The Foundational Capabilities pillar is focused on upgrading our operating platform to enhance the digital customer experience, create differentiation through data analytics to support the first three pillars, enhance core technology and align talent. We have maintained high quality personal service as one of our highest priorities since our inception and continue to strive for an unprecedented level of timely and accurate service to both our agents and policyholders. Examples of our high quality service include a live person answering phone calls and issuing policies within 24 hours of receiving the application if the paperwork is in good order. We believe high quality service is one of our strongest competitive advantages and the foundational capabilities pillar will look to continue to enhance our high quality service.

The combination of differentiated investment strategies and increased capital efficiency will improve annuity product competitiveness, thereby enhancing new business growth potential and further strengthening the operating platform. This will complete the virtuous cycle of the AEL 2.0 business model, having started with a strong, at scale annuity originator, that is even further strengthened by the power of the investments and capital structure pillars.

The migration towards the AEL 2.0 business model will result in 2021 being a transitional year for our financial results. We are migrating a fairly large balance sheet from a legacy core fixed income asset strategy with relatively higher asset leverage to a new asset allocation approach encompassing lower asset leverage, capital structure optimization through reinsurance and third-party capital, and utilization of alpha-producing assets to both improve sustainability of investment results in a low-interest rate environment and deliver superior, loss adjusted net yield over time. The scaling of alpha-producing assets is expected to be a multi-year journey. We are planning to add between \$1 billion and \$2 billion in private assets during 2021 and growing to a pace of 5% or greater of the portfolio in each subsequent year to evolve into our new asset allocation of 30% or greater in private assets.

During the second quarter of 2021, we made progress in the execution of the AEL 2.0 strategy. Key areas of progress included the following:

- we continued revitalization of our Go-to-Market strategy pillar. Go-to-Market has been trending upward since the fourth quarter of last year. Our fixed index annuity sales were driven by the new competitive indices we introduced to the AssetShield product in February. At Eagle Life, the increase in fixed index annuity sales was driven by new relationships, a new income product, and an increase in our employee wholesaler force;
- we started leveraging our asset management partnerships to invest in single-family rental homes and middle market loans consistent with ramping towards the AEL 2.0 asset allocation strategy. Year-to-date, we have purchased over \$800 million of privately-sourced alpha generating assets.
- we reached agreement with Brookfield on a reinsurance contract that covers both a portion of our in-force and new business flow. We have filed the agreement with our regulator for approval. We look forward to receiving regulatory approval and closing on the reinsurance treaty and the second half of the anticipated equity investment from Brookfield shortly after we receive regulatory approval.

On October 18, 2020, the Company's Board of Directors approved a \$500 million share repurchase program. The purpose of the share repurchase program is to both offset dilution from the issuance of shares to Brookfield and to institute a regular cash return program for shareholders. On July 1, 2021, we completed our share-repurchase of 9.1 million shares since starting our buyback in the fourth quarter of last year, which fully offset the impact of shares issued to Brookfield. The buyback included the repurchase of 3 million shares in the second quarter for \$95.1 million. As of August 6, 2021, we have repurchased approximately 9.1 million shares of our common stock at an average price of \$29.04 per common share.

On April 14, 2021, Fitch affirmed its "A-" financial strength rating on American Equity Investment Life Insurance Company and its life insurance subsidiaries, its "BBB" issuer default rating on American Equity Investment Life Holding Company and its "BBB-" senior unsecured debt ratings, and revised its outlook to "stable" from "negative" on its financial strength, issuer default and senior unsecured debt ratings.

On July 29, 2021, A.M. Best affirmed its "A-" financial strength rating on American Equity Investment Life Insurance Company and its subsidiaries, American Equity Investment Life Insurance Company of New York and Eagle Life Insurance Company, its "bbb-" long-term issuer credit rating of American Equity Investment Life Holding Company, its "bbb-" senior unsecured debt ratings, and its "bb" perpetual, non-cumulative preferred stock ratings. The outlook for these credit ratings of "stable" was also affirmed by A.M. Best on July 29, 2021.

Earnings from products accounted for as deposit liabilities are primarily generated from the excess of net investment income earned over the interest credited or the cost of providing index credits to the policyholder, or the "investment spread." Our investment spread is summarized as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
Average yield on invested assets	3.51%	4.12%	3.54%	4.24%
Aggregate cost of money	1.56%	1.73%	1.57%	1.73%
Aggregate investment spread	1.95%	2.39%	1.97%	2.51%
Impact of:				
Investment yield - additional prepayment income	0.10%	0.03%	0.11%	0.04%
Cost of money benefit from over hedging	0.04%	(0.01)%	0.03%	0.02%

The cost of money for fixed index annuities and average crediting rates for fixed rate annuities are computed based upon policyholder account balances and do not include the impact of amortization of deferred sales inducements. See Critical Accounting Policies - Deferred Policy Acquisition Costs and Deferred Sales Inducements included in Management's Discussion and Analysis in our Annual Report on Form 10-K for the year ended December 31, 2020. With respect to our fixed index annuities, the cost of money includes the average crediting rate on amounts allocated to the fixed rate strategy and expenses we incur to fund the annual index credits. Proceeds received upon expiration of call options purchased to fund annual index credits are recorded as part of the change in fair value of derivatives, and are largely offset by an expense for interest credited to annuity policyholder account balances. See Critical Accounting Policies - Policy Liabilities for Fixed Index Annuities and Financial Condition - Derivative Instruments included in Management's Discussion and Analysis in our Annual Report on Form 10-K for the year ended December 31, 2020.

Average yield on invested assets decreased primarily as a result of a higher level of cash and cash equivalent holdings during the three and six months ended June 30, 2021 compared to the same period in 2020. The higher level of cash and cash equivalent holdings was a result of our decision to execute a series of trades in the fourth quarter of 2020 designed to raise liquidity to fund block reinsurance transactions and de-risk the investment portfolio. Investment yields on investments purchased and funded during the first quarter of 2021 and most of 2020 were at average rates below the overall portfolio yield excluding the impact of cash and cash equivalent holdings on the overall portfolio yield. See **Net investment income**. Active management of policyholder crediting rates has continued to lower the aggregate cost of money. We expect to have flexibility to reduce our crediting rates if necessary and could decrease our cost of money by approximately 58 basis points if we reduce current rates to guaranteed minimums.

Results of Operations for the Three and Six Months Ended June 30, 2021 and 2020

Annuity deposits by product type collected during the three and six months ended June 30, 2021 and 2020, were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
American Equity Investment Life Insurance Company:				
Fixed index annuities	\$ 702,605	\$ 472,899	\$ 1,219,600	\$ 1,058,962
Annual reset fixed rate annuities	1,656	2,316	3,823	4,647
Multi-year fixed rate annuities	47,674	83	834,866	452
Single premium immediate annuities	15,430	10,084	29,389	15,482
	767,365	485,382	2,087,678	1,079,543
Eagle Life Insurance Company:				
Fixed index annuities	184,520	72,371	333,356	178,873
Annual reset fixed rate annuities	175	17	337	58
Multi-year fixed rate annuities	228,197	1,031	1,193,622	5,180
	412,892	73,419	1,527,315	184,111
Consolidated:				
Fixed index annuities	887,125	545,270	1,552,956	1,237,835
Annual reset fixed rate annuities	1,831	2,333	4,160	4,705
Multi-year fixed rate annuities	275,871	1,114	2,028,488	5,632
Single premium immediate annuities	15,430	10,084	29,389	15,482
Total before coinsurance ceded	1,180,257	558,801	3,614,993	1,263,654
Coinsurance ceded	3,702	5,691	6,750	23,394
Net after coinsurance ceded	\$ 1,176,555	\$ 553,110	\$ 3,608,243	\$ 1,240,260

Annuity deposits before and after coinsurance ceded increased 111% and 113%, respectively, during the second quarter of 2021 compared to the same period in 2020 and increased 186% and 191%, respectively, during the six months ended June 30, 2021 compared to the same period in 2020. The increases in sales in for the three and six months ended June 30, 2021 compared to the same periods in 2020 were driven by the sales of multi-year fixed rate annuity products introduced in late 2020 at both American Equity Life and Eagle Life and increased sales of fixed index annuities at both American Equity Life and Eagle Life. We are focused on our fixed index annuity products with recent product refreshes including the addition of three proprietary indices to our AssetShield product at American Equity Life and the addition of a guaranteed retirement income product at Eagle Life. We are targeting total sales of \$5 billion to \$6 billion in 2021.

Prior to January 1, 2021, we had been ceding 80% of the annuity deposits received from certain multi-year rate guaranteed annuities and 20% of certain fixed index annuities sold by Eagle Life through broker/dealers and banks to an unaffiliated reinsurer. Beginning January 1, 2021, no new business is being ceded to the unaffiliated reinsurer which caused the decreases in coinsurance ceded premiums for the three and six months ended June 30, 2021 compared to the same periods in 2020.

Net income (loss) available to common stockholders decreased to \$(65.6) million in the second quarter of 2021 and increased to \$206.2 million for the six months ended June 30, 2021 compared to \$(253.4) million and \$(17.0) million for the same periods in 2020.

Net income (loss) available to common stockholders for the three and six months ended June 30, 2021 was negatively impacted by a decrease in the aggregate investment spread as previously noted. Net income, in general, is impacted by the volume of business in force and the investment spread earned on this business. The average amount of annuity account balances outstanding (net of annuity liabilities ceded under coinsurance agreements) increased 6% to \$56.2 billion for the second quarter of 2021 and 4% to \$55.6 billion for the six months ended June 30, 2021 compared to \$53.2 billion and \$53.2 billion for the same periods in 2020. Our investment spread measured in dollars was \$277.2 million for the second quarter of 2021 and \$552.8 million for the six months ended June 30, 2021 compared to \$308.9 million and \$648.0 million for the same periods in 2020. Our investment spread has been negatively impacted by the extended low interest rate environment and by holding higher levels of cash and cash equivalents (see **Net investment income**). The higher levels of cash and cash equivalent holdings will continue until the Brookfield reinsurance transactions (and, potentially, others) are executed and excess cash and cash equivalent holdings are invested. We expect to invest most of the cash balances above our target cash levels into traditional fixed income securities during the rest of 2021. The impact of the extended low interest rate environment and higher cash and cash equivalent

holdings has been partially offset by a lower aggregate cost of money due to our continued active management of new business and renewal rates. Net income available to common stockholders for the three and six months ended June 30, 2021 was negatively impacted by an increase in other operating costs and expenses (see **Other operating costs and expenses**). We expect operating costs to trend higher over the coming quarters, as we will build out the necessary infrastructure to continue execution of the AEL 2.0 strategy. We expect the level of other operating costs and expenses to settle into the high \$40 million range each quarter beginning during 2022, post refinancing our existing redundant reserve financing facilities.

Net income (loss) was also impacted by the change in the fair value of derivatives and embedded derivatives, which fluctuates from period to period based upon changes in fair values of call options purchased to fund the annual index credits for fixed index annuities and changes in interest rates used to discount the embedded derivative liability. Net income (loss) for the three months ended June 30, 2021 was negatively impacted by a net decrease in the discount rates used to estimate the fair value of our embedded derivative liabilities, the impact of which was partially offset by decreases in amortization of deferred policy acquisition costs and deferred sales inducements related to the change in fair value of derivatives and embedded derivatives. Net income (loss) for the six months ended June 30, 2021 was positively impacted by a net increase in the discount rates used to estimate the fair value of our embedded derivative liabilities, the impact of which was partially offset by increases in amortization of deferred policy acquisition costs and deferred sales inducements related to the change in fair value of derivatives and embedded derivatives. Net income (loss) for the three and six months ended June 30, 2020 was negatively impacted by net decreases in the discount rates used to estimate the fair value of our embedded derivative liabilities, the impact of which was partially offset by decreases in amortization of deferred policy acquisition costs and deferred sales inducements related to the change in fair value of derivatives and embedded derivatives. See **Change in fair value of derivatives, Change in fair value of embedded derivatives, Amortization of deferred sales inducements and Amortization of deferred policy acquisition costs**.

Net income (loss) for the three and six months ended June 30, 2020 includes a benefit from the revision of assumptions used in determining the embedded derivative component of our fixed index annuity policy benefit reserves. The revision consisted of a refinement in the derivation of the discount rate used in calculating the fair value of embedded derivatives. The impact decreased change in fair value of embedded derivatives by \$230.1 million, increased amortization of deferred sales inducements and deferred policy acquisition costs by \$36.7 million and \$57.6 million, respectively, and decreased both net loss and net loss available to common stockholders by \$106.5 million.

Net income (loss) for the six months ended June 30, 2020 was impacted by a discrete tax item that provided a tax benefit of \$30.8 million related to the provision of the Coronavirus Aid, Relief, and Economic Security Act that allows net operating losses for 2018 through 2020 to be carried back to previous tax years in which a 35% statutory tax rate was in effect.

Non-GAAP operating income available to common stockholders, a non-GAAP financial measure, increased to \$93.8 million in the second quarter of 2021 and decreased to \$135.2 million for the six months ended June 30, 2021 compared to \$93.1 million and \$247.2 million for the same periods in 2020.

In addition to net income (loss) available to common stockholders, we have consistently utilized non-GAAP operating income available to common stockholders, a non-GAAP financial measure commonly used in the life insurance industry, as an economic measure to evaluate our financial performance. Non-GAAP operating income available to common stockholders equals net income (loss) available to common stockholders adjusted to eliminate the impact of items that fluctuate from quarter to quarter in a manner unrelated to core operations, and we believe measures excluding their impact are useful in analyzing operating trends. The most significant adjustments to arrive at non-GAAP operating income available to common stockholders eliminate the impact of fair value accounting for our fixed index annuity business and are not economic in nature but rather impact the timing of reported results. We believe the combined presentation and evaluation of non-GAAP operating income available to common stockholders together with net income (loss) available to common stockholders provides information that may enhance an investor's understanding of our underlying results and profitability.

Non-GAAP operating income available to common stockholders is not a substitute for net income (loss) available to common stockholders determined in accordance with GAAP. The adjustments made to derive non-GAAP operating income available to common stockholders are important to understand our overall results from operations and, if evaluated without proper context, non-GAAP operating income available to common stockholders possesses material limitations. As an example, we could produce a low level of net income available to common stockholders or a net loss available to common stockholders in a given period, despite strong operating performance, if in that period we experience significant net realized losses from our investment portfolio. We could also produce a high level of net income available to common stockholders in a given period, despite poor operating performance, if in that period we generate significant net realized gains from our investment portfolio. As an example of another limitation of non-GAAP operating income available to common stockholders, it does not include the decrease in cash flows expected to be collected as a result of credit losses on financial assets. Therefore, our management reviews net realized investment gains (losses) and analyses of our net investment income, including impacts related to credit losses, in connection with their review of our investment portfolio. In addition, our management examines net income (loss) available to common stockholders as part of their review of our overall financial results.

The adjustments made to net income (loss) available to common stockholders to arrive at non-GAAP operating income available to common stockholders for the three and six months ended June 30, 2021 and 2020 are set forth in the table that follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Reconciliation from net income (loss) available to common stockholders to non-GAAP operating income available to common stockholders:				
Net income (loss) available to common stockholders	\$ (65,613)	\$ (253,379)	\$ 206,152	\$ (17,043)
Adjustments to arrive at non-GAAP operating income available to common stockholders:				
Net realized gains/losses on financial assets, including credit losses	2,912	18,492	6,428	34,841
Change in fair value of derivatives and embedded derivatives - fixed index annuities	200,767	423,590	(96,867)	303,136
Change in fair value of derivatives - interest rate caps and swap	—	—	—	(848)
Income taxes	(44,278)	(95,599)	19,516	(72,897)
Non-GAAP operating income available to common stockholders	<u>\$ 93,788</u>	<u>\$ 93,104</u>	<u>\$ 135,229</u>	<u>\$ 247,189</u>

The amounts disclosed in the reconciliation above are presented net of related adjustments to amortization of deferred sales inducements and deferred policy acquisition costs and accretion of lifetime income benefit rider reserves where applicable.

The increase in non-GAAP operating income available to common stockholders for the three months ended June 30, 2021 compared to the same period in 2020 was primarily attributable to a smaller increase in the liability for future benefits to be paid for lifetime income benefit riders which was substantially offset by a decrease in aggregate investment spread previously noted and an increase in other operating costs and expenses. The decrease in non-GAAP operating income available to common stockholders for the six months ended June 30, 2021 compared to the same period in 2020 was primarily attributable to a decrease in aggregate investment spread, increases in amortization of deferred sales inducements and deferred policy acquisition costs and an increase in other operating costs and expenses offset by a smaller increase in the liability for future benefits to be paid for lifetime income benefit riders. See **Net investment income, Interest sensitive and index product benefits, Amortization of deferred sales inducements, Amortization of deferred policy acquisition costs and Other operating costs and expenses**.

Non-GAAP operating income available to common stockholders for the six months ended June 30, 2020 was impacted by a \$30.8 million tax benefit from a discrete tax item related to the Coronavirus Aid, Relief, and Economic Security Act. See **Net income (loss) available to common stockholders**.

Annuity product charges (surrender charges assessed against policy withdrawals and fees deducted from policyholder account balances for lifetime income benefit riders) increased 1% to \$63.8 million in the second quarter of 2021 and 1% to \$123.8 million for the six months ended June 30, 2021 compared to \$63.4 million and \$123.0 million for the same periods in 2020. The components of annuity product charges are set forth in the table that follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Surrender charges	\$ 18,057	\$ 19,390	\$ 37,538	\$ 39,095
Lifetime income benefit riders (LIBR) fees	45,702	44,048	86,303	83,892
	<u>\$ 63,759</u>	<u>\$ 63,438</u>	<u>\$ 123,841</u>	<u>\$ 122,987</u>
Withdrawals from annuity policies subject to surrender charges	\$ 300,831	\$ 202,187	\$ 561,489	\$ 396,977
Average surrender charge collected on withdrawals subject to surrender charges	6.0 %	9.6 %	6.7 %	9.8 %
Fund values on policies subject to LIBR fees	\$ 6,019,984	\$ 5,837,051	\$ 11,324,365	\$ 11,032,388
Weighted average per policy LIBR fee	0.76 %	0.75 %	0.76 %	0.76 %

The increases in annuity product charges for the three and six month periods ended June 30, 2021 compared to the same periods in 2020 were attributable to increases in fees assessed for lifetime income benefit riders due to larger volumes of business in force subject to the fee compared to the prior periods. The increases in fees assessed for lifetime income benefit riders were offset by decreases in surrender charges collected on withdrawals as the increases in withdrawals from annuity policies subject to surrender charges were more than offset by lower average surrender charges collected on those withdrawals due to changes in the surrender charge levels on policies that were surrendered during the three and six months ended June 30, 2021 compared to the same periods in 2020. See **Interest sensitive and index product benefits** below for corresponding expense recognized on lifetime income benefit riders.

Net investment income decreased 8% to \$499.3 million in the second quarter of 2021 and 11% to \$996.5 million for the six months ended June 30, 2021 compared to \$543.7 million and \$1,117.0 million for the same periods in 2020. The decreases were principally attributable to decreases in average yield earned on average invested assets during the three and six months ended June 30, 2021 compared to the same periods in 2020, partially offset by increases in our average invested assets during the three and six months ended June 30, 2021 compared to the same periods in 2020. Average invested assets excluding derivative instruments (on an amortized cost basis) increased 8% to \$57.0 billion for the second quarter of 2021 and 7% to \$56.4 billion for the six months ended June 30, 2021 compared to \$52.9 billion and \$52.8 billion for the same periods in 2020.

The average yield earned on average invested assets was 3.51% for the second quarter of 2021 and 3.54% for the six months ended June 30, 2021 compared to 4.12% and 4.24% for the same periods in 2020. The decreases in average yield earned for the three and six months ended June 30, 2021 compared to the same periods in 2020 were primarily attributable to increases in our level of cash and cash equivalent holdings as previously described and investment of new premiums and portfolio cash flows during the first half of 2021 and most of 2020 at average rates below the overall portfolio yield, excluding the impact of cash and cash equivalent holdings on the overall portfolio yield. Cash and cash equivalents holdings averaged \$10.0 billion during the three months ended June 30, 2021 compared to \$1.4 billion during the three months ended June 30, 2020. As of June 30, 2021, we held approximately \$10 billion of cash and cash equivalents yielding 0.02%. We intend to hold approximately 1% to 2% of our investment portfolio in cash and cash equivalents once we are fully invested.

The expected return on investments purchased during the three and six months ended June 30, 2021 was 4.15% and 3.99%, net of third-party investment management expenses. Purchases for the three months ended June 30, 2021 included \$1.1 billion of fixed maturity securities with an expected return of 3.38% and \$569 million of privately sourced assets with an expected return of 5.67%. The privately sourced assets include investments in investment real estate and middle market loans through our asset management partnerships, as well as ongoing origination of mortgage loans. The expected return on investments purchased during the three and six months ended June 30, 2020 was 4.58% and 3.78%.

Change in fair value of derivatives primarily consists of call options purchased to fund annual index credits on fixed index annuities. The components of change in fair value of derivatives are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Call options:				
Gain on option expiration	\$ 533,412	\$ (109,367)	\$ 711,478	\$ 736
Change in unrealized gains/losses	(32,619)	437,029	185,591	(615,010)
Warrants	87	—	116	—
Interest rate caps	—	—	—	62
	<u>\$ 500,880</u>	<u>\$ 327,662</u>	<u>\$ 897,185</u>	<u>\$ (614,212)</u>

The differences between the change in fair value of derivatives between periods for call options are primarily due to the performance of the indices upon which our call options are based which impacts the level of gains on call option expirations, the fair values of those call options and changes in the fair values of those call options between periods. The changes in gain on option expiration and unrealized gains/losses on call options for the three and six months ended June 30, 2021 compared to the same periods in 2020 reflect the impact of the recovery of the equity markets subsequent to the equity markets decline in March of 2020 related to the economic uncertainty caused by the COVID-19 pandemic. A substantial portion of our call options are based upon the S&P 500 Index with the remainder based upon other equity and bond market indices. The range of index appreciation (after applicable caps, participation rates and asset fees) for options expiring during the three and six months ended June 30, 2021 and 2020 is as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
S&P 500 Index				
Point-to-point strategy	1.0% - 34.5%	0.0% - 7.0%	0.0% - 42.6%	0.0% - 17.4%
Monthly average strategy	1.0% - 23.7%	0.0% - 8.0%	0.0% - 29.4%	0.0% - 11.9%
Monthly point-to-point strategy	0.6% - 21.7%	0.0% - 0.0%	0.0% - 21.7%	0.0% - 14.0%
Volatility control index point-to-point strategy	0.0% - 9.7%	0.0% - 2.0%	0.0% - 9.7%	0.0% - 9.3%
Fixed income (bond index) strategies	0.0% - 5.9%	0.0% - 10.0%	0.0% - 10.0%	0.0% - 13.6%

The change in fair value of derivatives is also influenced by the aggregate cost of options purchased. The aggregate cost of options for the three and six months ended June 30, 2021 were lower than for the same periods in 2020 as option costs generally decreased during 2020 and into 2021. The aggregate cost of options is also influenced by the amount of policyholder funds allocated to the various indices and market volatility which affects option pricing. See Critical Accounting Policies - Policy Liabilities for Fixed Index Annuities included in Management's Discussion and Analysis in our Annual Report on Form 10-K for the year ended December 31, 2020.

Net realized gains (losses) on investments includes gains and losses on the sale of securities and other investments and changes in allowances for credit losses on our securities and mortgage loans on real estate. Net realized gains (losses) on investments fluctuate from year to year primarily due to changes in the interest rate and economic environment and the timing of the sale of investments. See Note 4 and Note 5 to our unaudited consolidated financial statements and Financial Condition - Credit Losses for a detailed presentation of the types of investments that generated the gains (losses) as well as discussion of credit losses on our securities recognized during the periods presented and Financial Condition - Investments and Note 5 to our unaudited consolidated financial statements for discussion of credit losses recognized on mortgage loans on real estate.

Securities sold at losses are generally due to our long-term fundamental concern with the issuers' ability to meet their future financial obligations or to improve our risk or duration profiles as they pertain to our asset liability management. During the six months ended June 30, 2020, securities were sold in order to increase our cash and cash equivalent holdings in response to the COVID-19 pandemic.

Interest sensitive and index product benefits increased 237% to \$813.0 million in the second quarter of 2021 and 101% to \$1,289.6 million for the six months ended June 30, 2021 compared to \$241.0 million and \$641.2 million for the same periods in 2020. The components of interest sensitive and index product benefits are summarized as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Index credits on index policies	\$ 714,291	\$ 97,875	\$ 1,060,028	\$ 376,815
Interest credited (including changes in minimum guaranteed interest for fixed index annuities)	64,519	48,025	122,642	100,036
Lifetime income benefit riders	34,171	95,092	106,906	164,360
	<u>\$ 812,981</u>	<u>\$ 240,992</u>	<u>\$ 1,289,576</u>	<u>\$ 641,211</u>

The increases in index credits for the three and six months ended June 30, 2021 compared to the same periods in 2020 were due to changes in the level of appreciation of the underlying indices (see discussion above under **Change in fair value of derivatives**) and the amount of funds allocated by policyholders to the respective index options. Total proceeds received upon expiration of the call options purchased to fund the annual index credits were \$720.5 million and \$1,069.6 million for the three and six months ended June 30, 2021, compared to \$97.0 million and \$382.3 million for the same periods in 2020. The increases in interest credited for the three and six months ended June 30, 2021 compared to the same periods in 2020 were due to increases in sales of single premium deferred annuity products that receive a fixed rate of interest partially offset by a reduction in interest credited to funds allocated to the fixed option within our fixed index annuities due to a decrease in the average balance allocated to the fixed option. The decreases in benefits recognized for lifetime income benefit riders for the three and six months ended June 30, 2021 compared to the same periods in 2020 were primarily due to the level of index credits on index policies for the three and six months ended June 30, 2021 compared to the same period in 2020.

The liability (net of coinsurance ceded) for lifetime income benefit riders was \$2.5 billion and \$2.5 billion at June 30, 2021 and December 31, 2020, respectively which includes the impact of unrealized gains and losses on available for sale securities on the liability for lifetime income benefit riders of \$508.0 million and \$584.6 million at June 30, 2021 and December 31, 2020, respectively.

Amortization of deferred sales inducements before gross profit adjustments decreased for the three months ended June 30, 2021 compared to the same period in 2020 and increased for the six months ended June 30, 2021 compared to the same period in 2020. Amortization of deferred sales inducements is based on historical, current and future expected gross profits. The changes in amortization from period to period are the result of differences in actual gross profits compared to expected or modeled gross profits and changes to the underlying business. The primary reason for the increase in amortization of deferred sales inducements before gross profit adjustments for the six months ended June 30, 2021 compared to the same period in 2020 was due to reductions to certain crediting rates made during the six months ended June 30, 2020 that increased future expected gross profits and reduced amortization for the six months ended June 30, 2020. Offsetting this impact were index credits on index policies for the six months ended June 30, 2021 being in excess of index credits on index policies for the same period of 2020 and actual gross profits for the six months ended June 30, 2021 being lower than actual gross profits for the same period in 2020 both which resulted in lower amortization for the six months ended June 30, 2021 compared to the same period in 2020. Amortization of deferred sales inducements before gross profit adjustments for the three months ended June 30, 2021 and 2020 was flat as the three months ended June 30, 2021 benefited from the impact of strong index credits on index policies and lower actual gross profits while the three months ended June 30, 2020 benefited from the crediting rate changes noted above. Bonus products represented 73% and 77% of our net annuity account values at June 30, 2021 and June 30, 2020, respectively. The amount of amortization is affected by amortization associated with fair value accounting for derivatives and embedded derivatives utilized in our fixed index annuity business and amortization associated with net realized gains (losses) on investments. Fair value accounting for derivatives and embedded derivatives utilized in our fixed index annuity business creates differences in the recognition of revenues and expenses from derivative instruments including the embedded derivative liabilities in our fixed index annuity contracts. The change in fair value of the embedded derivatives will not correspond to the change in fair value of the derivatives (purchased call options), because the purchased call options are one-year options while the options valued in the fair value of embedded derivatives cover the expected lives of the contracts which typically exceed ten years.

Amortization of deferred sales inducements is summarized as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Amortization of deferred sales inducements before gross profit adjustments	\$ 39,554	\$ 40,333	\$ 92,741	\$ 84,241
Gross profit adjustments:				
Fair value accounting for derivatives and embedded derivatives	(52,106)	(112,842)	18,139	(81,043)
Net realized losses on investments	32	(2,669)	(425)	(4,785)
Amortization of deferred sales inducements after gross profit adjustments	<u>\$ (12,520)</u>	<u>\$ (75,178)</u>	<u>\$ 110,455</u>	<u>\$ (1,587)</u>

Change in fair value of embedded derivatives includes changes in the fair value of our fixed index annuity embedded derivatives (see Note 7 to our unaudited consolidated financial statements). The components of change in fair value of embedded derivatives are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Fixed index annuities - embedded derivatives	\$ 126,084	\$ 913,984	\$ (251,037)	\$ (371,087)
Other changes in difference between policy benefit reserves computed using derivative accounting vs. long-duration contracts accounting	147,629	212,951	242,337	247,961
	<u>\$ 273,713</u>	<u>\$ 1,126,935</u>	<u>\$ (8,700)</u>	<u>\$ (123,126)</u>

The change in fair value of the fixed index annuity embedded derivatives resulted from (i) changes in the expected index credits on the next policy anniversary dates, which are related to the change in fair value of the call options acquired to fund those index credits discussed above in **Change in fair value of derivatives**; (ii) changes in the expected annual cost of options we will purchase in the future to fund index credits beyond the next policy anniversary; (iii) changes in the discount rates used in estimating our embedded derivative liabilities; and (iv) the growth in the host component of the policy liability. The amounts presented as "Other changes in difference between policy benefit reserves computed using derivative accounting vs. long-duration contracts accounting" represent the total change in the difference between policy benefit reserves for fixed index annuities computed under the derivative accounting standard and the long-duration contracts accounting standard at each balance sheet date, less the change in fair value of our fixed index annuities embedded derivative. See Critical Accounting Policies - Policy Liabilities for Fixed Index Annuities included in Management's Discussion and Analysis in our Annual Report on Form 10-K for the year ended December 31, 2020.

The primary reason for the increase in the change in fair value of the fixed index annuity embedded derivatives during the six months ended June 30, 2021 compared to the same period of 2020 was an increase in the expected index credits on the next policy anniversary dates resulting from increases in the fair value of the call options acquired to fund these index credits during the six months ended June 30, 2021 compared to decreases in the expected index credits resulting from decreases in the fair value of the call options acquired to fund these index credits during the six months ended June 30, 2020. This increase was partially offset by an increase in the net discount rate during the six months ended June 30, 2021 compared to the same period of 2020. The increase in the net discount rate for the six months ended June 30, 2021 consists primarily of an increase in treasury rates. The discount rates used in estimating our embedded derivative liabilities fluctuate based on the changes in the general level of risk free interest rates and our own credit spread. The primary reasons for the decrease in the change in fair value of the fixed index annuity embedded derivatives during the three months ended June 30, 2021 compared to the same period in 2020 were a smaller decrease in the net discount rate for the three months ended June 30, 2021 compared to the same period of 2020 and decreases in the expected index credits on the next policy anniversary dates resulting from decreases in the fair value of the call options acquired to fund these index credits during the three months ended June 30, 2021 compared to the same period of 2020.

Amortization of deferred policy acquisition costs before gross profit adjustments increased for the three and six months ended June 30, 2021 compared to the same periods in 2020. Amortization of deferred policy acquisition costs is based on historical, current and future expected gross profits. The changes in amortization from period to period are the result of differences in actual gross profits compared to expected or modeled gross profits and changes to the underlying business. The primary reason for the increase in amortization of deferred policy acquisition costs before gross profit adjustments for the six months ended June 30, 2021 compared to the same period in 2020 was due to reductions to certain crediting rates made during the six months ended June 30, 2020 that increased future expected gross profits and reduced amortization for the six months ended June 30, 2020. Offsetting this impact were index credits on index policies for the six months ended June 30, 2021 being in excess of index credits on index policies for the same period of 2020 and actual gross profits for the six months ended June 30, 2021 being lower than actual gross profits for the same period in 2020 both which resulted in lower amortization for the six months ended June 30, 2021 compared to the same period in 2020. Amortization of deferred policy acquisition costs before gross profit adjustments for the three months ended June 30, 2021 and 2020 was flat as the three months ended June 30, 2021 benefited from the impact of strong index credits on index policies and lower actual gross profits while the three months ended June 30, 2020 benefited from the crediting rate changes noted above. The amount of amortization is affected by amortization associated with fair value accounting for derivatives and embedded derivatives utilized in our fixed index annuity business and amortization associated with net realized gains (losses) on investments. As discussed above, fair value accounting for derivatives and embedded derivatives utilized in our fixed index annuity business creates differences in the recognition of revenues and expenses from derivative instruments including the embedded derivative liabilities in our fixed index annuity contracts.

Amortization of deferred policy acquisition costs is summarized as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
	(Dollars in thousands)			
Amortization of deferred policy acquisition costs before gross profit adjustments	\$ 61,496	\$ 61,240	\$ 140,153	\$ 127,496
Gross profit adjustments:				
Fair value accounting for derivatives and embedded derivatives	(78,395)	(177,014)	47,525	(119,375)
Net realized losses on investments	(7)	(4,115)	(761)	(7,308)
Amortization of deferred policy acquisition costs after gross profit adjustments	<u>\$ (16,906)</u>	<u>\$ (119,889)</u>	<u>\$ 186,917</u>	<u>\$ 813</u>

Other operating costs and expenses increased 55% to \$65.1 million in the second quarter of 2021 and 41% to \$120.9 million for the six months ended June 30, 2021 compared to \$42.0 million and \$85.6 million for the same periods in 2020 and are summarized as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
	(Dollars in thousands)			
Salary and benefits	\$ 35,755	\$ 21,832	\$ 63,708	\$ 43,987
Risk charges	11,754	11,107	23,796	21,947
Other	17,541	9,012	33,411	19,643
Total other operating costs and expenses	<u>\$ 65,050</u>	<u>\$ 41,951</u>	<u>\$ 120,915</u>	<u>\$ 85,577</u>

Salary and benefits for the three and six months ended June 30, 2021 increased \$13.9 million and \$19.7 million, respectively, compared to the same periods in 2020. These increases are primarily a result of an increase in salary and benefits of \$6.0 million and an increase of \$8.2 million related to expense recognized under our equity and cash incentive compensation programs ("incentive compensation programs") for the three months ended June 30, 2021 compared to the same period in 2020 and an increase in salary and benefits of \$7.8 million and an increase of \$11.6 million related to incentive compensation programs for the six months ended June 30, 2021 compared to the same period in 2020. The increases in salary and benefits were primarily due to an increased number of employees related to our continued growth and implementation of AEL 2.0. The increases in expenses related to our incentive compensation programs were primarily due to an increase in the expected payouts due to a larger number of employees participating in the programs and higher potential payouts for certain employees participating in the programs. The increases in salary and benefits for both the three and six months ended June 30, 2021 include \$5.1 million of expenses associated with talent transition as we implement the AEL 2.0 strategy.

The increases in risk charges expense for the three and six months ended June 30, 2021 compared to the same periods in 2020 were due to increases in the amount of excess regulatory reserves ceded to an unaffiliated reinsurer. The excess regulatory reserves ceded at June 30, 2021 and 2020 were \$1,446.1 million and \$1,276.6 million, respectively.

Other expenses increased for the three and six months ended June 30, 2021 compared to the same periods in 2020 primarily as a result of increases in legal and consulting fees related to the implementation of AEL 2.0 and increases in depreciation and maintenance expense related to software and hardware assets.

Income tax expense (benefit) was \$(15.7) million in the second quarter of 2021 and \$62.8 million for the six months ended June 30, 2021 compared to \$(68.5) million and \$(41.2) million for the same periods in 2020. The changes in income tax expense (benefit) were primarily due to changes in income (loss) before income taxes as well as changes in the effective income tax rates. The effective income tax rates for the three and six months ended June 30, 2021 were 22.3% and 21.6%, respectively, and 21.7% and 90.2% for the same periods in 2020, respectively.

Income tax expense (benefit) and the resulting effective tax rate are based upon two components of income (loss) before income taxes ("pretax income") that are taxed at different tax rates. Life insurance income is generally taxed at a statutory rate of approximately 21.5% reflecting the absence of state income taxes for substantially all of the states that the life insurance subsidiaries do business in. The income (loss) for the parent company and other nonlife insurance subsidiaries (the "nonlife insurance group") is generally taxed at a statutory tax rate of 28.7% reflecting the combined federal and state income tax rates. The effective income tax rates resulting from the combination of the income tax provisions for the life and nonlife sources of income (loss) vary from period to period based primarily on the relative size of pretax income from the two sources.

The effective tax rates for the three and six months ended June 30, 2021 and the three months ended June 30, 2020 were not significantly impacted by discrete tax items. The effective tax rate for the six months ended June 30, 2020 was impacted by a discrete tax item that provided a tax benefit of \$30.8 million related to the provision of the Coronavirus Aid, Relief, and Economic Security Act that allowed net operating losses for 2018 through 2020 to be carried back to previous tax years in which a 35% statutory tax rate was in effect. The effective income tax rates excluding the impact of discrete items were 22.1% and 21.6%, respectively, for the three and six months ended June 30, 2021 and 21.7% and 22.0% for the same periods in 2020, respectively.

Financial Condition

Investments

Our investment strategy is to maximize current income and total investment return through active management while maintaining a responsible asset allocation strategy containing high credit quality investments and providing adequate liquidity to meet our cash obligations to policyholders and others. Our investment strategy is also reflective of insurance statutes, which regulate the type of investments that our life subsidiaries are permitted to make and which limit the amount of funds that may be used for any one type of investment.

As previously noted, as part of our AEL 2.0 investment pillar, we intend to ramp up our allocation to alpha assets by partnering with proven asset managers in our focus expansion sectors of middle market credit, real estate, infrastructure debt and agricultural loans.

The composition of our investment portfolio is summarized as follows:

	June 30, 2021		December 31, 2020	
	Carrying Amount	Percent	Carrying Amount	Percent
(Dollars in thousands)				
Fixed maturity securities:				
United States Government full faith and credit	\$ 38,879	0.1 %	\$ 39,771	0.1 %
United States Government sponsored agencies	1,046,186	2.0 %	1,039,551	1.9 %
United States municipalities, states and territories	3,700,225	6.9 %	3,776,131	7.0 %
Foreign government obligations	197,330	0.4 %	202,706	0.4 %
Corporate securities	31,455,817	58.6 %	31,156,827	58.1 %
Residential mortgage backed securities	1,192,423	2.2 %	1,512,831	2.8 %
Commercial mortgage backed securities	4,175,517	7.8 %	4,261,227	8.0 %
Other asset backed securities	4,852,879	9.0 %	5,549,849	10.4 %
Total fixed maturity securities	46,659,256	87.0 %	47,538,893	88.7 %
Mortgage loans on real estate	4,299,945	8.0 %	4,165,489	7.8 %
Real estate	258,237	0.5 %	—	— %
Derivative instruments	1,459,965	2.7 %	1,310,954	2.4 %
Other investments	962,305	1.8 %	590,078	1.1 %
	<u>\$ 53,639,708</u>	<u>100.0 %</u>	<u>\$ 53,605,414</u>	<u>100.0 %</u>

Fixed Maturity Securities

Our fixed maturity security portfolio is managed to minimize risks such as interest rate changes and defaults or credit losses while earning a sufficient and stable return on our investments. The largest portion of our fixed maturity securities are in investment grade (typically NAIC designation 1 or 2) publicly traded or privately placed corporate securities.

A summary of our fixed maturity securities by NRSRO ratings is as follows:

Rating Agency Rating	June 30, 2021		December 31, 2020	
	Carrying Amount	Percent of Fixed Maturity Securities	Carrying Amount	Percent of Fixed Maturity Securities
(Dollars in thousands)				
Aaa/Aa/A	\$ 27,097,912	58.1 %	\$ 27,883,428	58.7 %
Baa	18,570,085	39.8 %	18,408,954	38.7 %
Total investment grade	<u>45,667,997</u>	<u>97.9 %</u>	<u>46,292,382</u>	<u>97.4 %</u>
Ba	800,364	1.7 %	973,581	2.0 %
B	82,971	0.2 %	122,553	0.3 %
Caa	46,470	0.1 %	61,037	0.1 %
Ca and lower	61,454	0.1 %	89,340	0.2 %
Total below investment grade	<u>991,259</u>	<u>2.1 %</u>	<u>1,246,511</u>	<u>2.6 %</u>
	<u>\$ 46,659,256</u>	<u>100.0 %</u>	<u>\$ 47,538,893</u>	<u>100.0 %</u>

The NAIC's Securities Valuation Office ("SVO") is responsible for the day-to-day credit quality assessment of securities owned by state regulated insurance companies. The purpose of such assessment and valuation is for determining regulatory capital requirements and regulatory reporting. Insurance companies report ownership to the SVO when such securities are eligible for regulatory filings. The SVO conducts credit analysis on these securities for the purpose of assigning a NAIC designation and/or unit price. Typically, if a security has been rated by an NRSRO, the SVO utilizes that rating and assigns an NAIC designation based upon the following system:

NAIC Designation	NRSRO Equivalent Rating
1	Aaa/Aa/A
2	Baa
3	Ba
4	B
5	Caa
6	Ca and lower

For most of the bonds held in our portfolio the NAIC designation matches the NRSRO equivalent rating. However, for certain loan-backed and structured securities, as defined by the NAIC, the NAIC rating is not always equivalent to the NRSRO rating presented in the previous table. The NAIC has adopted revised rating methodologies for certain loan-backed and structured securities comprised of non-agency residential mortgage backed securities ("RMBS") and commercial mortgage backed securities ("CMBS"). The NAIC's objective with the revised rating methodologies for these structured securities is to increase the accuracy in assessing expected losses and use the improved assessment to determine a more appropriate capital requirement for such structured securities. The revised methodologies reduce regulatory reliance on rating agencies and allow for greater regulatory input into the assumptions used to estimate expected losses from structured securities.

The use of this process by the SVO may result in certain non-agency RMBS and CMBS being assigned an NAIC designation that is different than the equivalent NRSRO rating. The NAIC designations for non-agency RMBS and CMBS are based on security level expected losses as modeled by an independent third party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized. Evaluation of non-agency RMBS and CMBS held by insurers using the NAIC rating methodologies is performed on an annual basis.

Our fixed maturity security portfolio is managed to minimize risks such as defaults or impairments while earning a sufficient and stable return on our investments. Our strategy with respect to our fixed maturity securities portfolio has been to invest primarily in investment grade securities. Investment grade is NAIC 1 and 2 securities and Baa3/BBB- and better securities on the NRSRO scale. This strategy meets the objective of minimizing risk while also managing asset capital charges on a regulatory capital basis.

A summary of our fixed maturity securities by NAIC designation is as follows:

NAIC Designation	June 30, 2021				December 31, 2020			
	Amortized Cost	Fair Value	Carrying Amount	Percent of Total Carrying Amount	Amortized Cost	Fair Value	Carrying Amount	Percent of Total Carrying Amount
	(Dollars in thousands)				(Dollars in thousands)			
1	\$ 23,059,347	\$ 25,937,900	\$ 25,937,900	55.6 %	\$ 23,330,149	\$ 26,564,542	\$ 26,564,542	55.9 %
2	17,496,467	19,387,062	19,387,062	41.6 %	17,312,485	19,377,013	19,377,013	40.8 %
3	1,094,635	1,135,994	1,135,994	2.4 %	1,292,124	1,299,455	1,299,455	2.7 %

Residential mortgage backed securities	43	173,875	(2,526)	(1,734)	169,615
Commercial mortgage backed securities	122	1,034,424	(64,678)	—	969,746
Other asset backed securities	558	3,728,144	(146,640)	—	3,581,504
	<u>843</u>	<u>\$ 6,080,517</u>	<u>\$ (250,826)</u>	<u>\$ (64,771)</u>	<u>\$ 5,764,920</u>

The unrealized losses at June 30, 2021 are principally related to the timing of the purchases of certain securities, which carry less yield than those available at June 30, 2021, and the continued impact the COVID-19 pandemic had on credit markets. Approximately 82% and 75% of the unrealized losses on fixed maturity securities shown in the above table for June 30, 2021 and December 31, 2020, respectively, are on securities that are rated investment grade, defined as being the highest two NAIC designations.

The decrease in unrealized losses from December 31, 2020 to June 30, 2021 was primarily related to pricing improvements due to improved credit quality for certain fixed maturity securities during the six months ended June 30, 2021 and strategies to reposition the fixed maturity security portfolio that resulted in the sales of certain securities that were in an unrealized loss position at December 31, 2020. This decrease was partially offset by an increase in treasury yields during the six months ended June 30, 2021. The 10-year U.S. Treasury yields at June 30, 2021 and December 31, 2020 were 1.45% and 0.93%, respectively. The 30-year U.S. Treasury yields at June 30, 2021 and December 31, 2020 were 2.06% and 1.65%, respectively.

The following table sets forth the composition by credit quality (NAIC designation) of fixed maturity securities with gross unrealized losses:

NAIC Designation	Carrying Value of Securities with Gross Unrealized Losses	Percent of Total	Gross Unrealized Losses (1)	Percent of Total
(Dollars in thousands)				
June 30, 2021				
1	\$ 1,350,250	38.5 %	\$ (36,604)	38.1 %
2	1,691,337	48.2 %	(41,819)	43.5 %
3	380,830	10.8 %	(14,670)	15.2 %
4	54,641	1.5 %	(2,467)	2.6 %
5	16,230	0.5 %	(305)	0.3 %
6	16,427	0.5 %	(332)	0.3 %
	<u>\$ 3,509,715</u>	<u>100.0 %</u>	<u>\$ (96,197)</u>	<u>100.0 %</u>
December 31, 2020				
1	\$ 2,625,341	45.5 %	\$ (82,045)	32.7 %
2	2,286,377	39.7 %	(106,700)	42.5 %
3	650,364	11.3 %	(42,040)	16.8 %
4	178,669	3.1 %	(16,274)	6.5 %
5	4,991	0.1 %	(1,640)	0.7 %
6	19,178	0.3 %	(2,127)	0.8 %
	<u>\$ 5,764,920</u>	<u>100.0 %</u>	<u>\$ (250,826)</u>	<u>100.0 %</u>

(1) Gross unrealized losses have been adjusted to reflect the allowance for credit loss of \$14.2 million and \$64.8 million as of June 30, 2021 and December 31, 2020, respectively.

Our investments' gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities (consisting of 543 and 843 securities, respectively) have been in a continuous unrealized loss position at June 30, 2021 and December 31, 2020, along with a description of the factors causing the unrealized losses is presented in Note 4 to our unaudited consolidated financial statements in this Form 10-Q, which is incorporated by reference in this Item 2.

The amortized cost and fair value of fixed maturity securities in an unrealized loss position and the number of months in a continuous unrealized loss position (fixed maturity securities that carry an NRSRO rating of BBB/Baa or higher are considered investment grade) were as follows:

	Number of Securities	Amortized Cost, Net of Allowance (1)	Fair Value	Gross Unrealized Losses, Net of Allowance (1)
(Dollars in thousands)				
June 30, 2021				
Fixed maturity securities, available for sale:

	19	\$ 71,705	\$ 62,929	\$ (8,776)

(1) Amortized cost and gross unrealized losses have been adjusted to reflect the allowance for credit loss of \$14.2 million and \$64.8 million as of June 30, 2021 and December 31, 2020, respectively.

The amortized cost and fair value of fixed maturity securities, by contractual maturity, that were in an unrealized loss position are shown below. Actual maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. All of our mortgage and other asset backed securities provide for periodic payments throughout their lives, and are shown below as a separate line.

International Exposure

We hold fixed maturity securities with international exposure. As of June 30, 2021, 16.1% of the carrying value of our fixed maturity securities was comprised of corporate debt securities of issuers based outside of the United States and debt securities of foreign governments. All of our fixed maturity securities with international exposure are denominated in U.S. dollars. Our investment professionals analyze each holding for credit risk by economic and other factors of each country and industry. The following table presents our international exposure in our fixed maturity portfolio by country or region:

	June 30, 2021		
	Amortized Cost	Carrying Amount/ Fair Value	Percent of Total Carrying Amount
	(Dollars in thousands)		
GIIPS (1)	\$ 226,709	\$ 251,262	0.5 %
Asia/Pacific	400,407	452,346	1.0 %
Non-GIIPS Europe	2,681,680	3,009,229	6.4 %
Latin America	228,323	258,866	0.6 %
Non-U.S. North America	1,390,838	1,571,209	3.4 %
Australia & New Zealand	952,530	1,032,581	2.2 %
Other	824,673	918,290	2.0 %
	<u>\$ 6,705,160</u>	<u>\$ 7,493,783</u>	<u>16.1 %</u>

- (1) Greece, Ireland, Italy, Portugal and Spain ("GIIPS"). All of our exposure in GIIPS are corporate securities with issuers domiciled in these countries. None of our foreign government obligations were held in any of these countries.

All of the securities presented in the table above are investment grade (NAIC designation of either 1 or 2), except for the following:

	June 30, 2021	
	Amortized Cost	Carrying Amount/ Fair Value

Non-U.S. North America	96,612	101,761
Australia & New Zealand	626	600
Other	88,663	94,339
	<u>\$ 326,813</u>	<u>\$ 348,185</u>

Watch List

At each balance sheet date, we identify invested assets which have characteristics (i.e., significant unrealized losses compared to amortized cost and industry trends) creating uncertainty as to our future assessment of credit losses. As part of this assessment, we review not only a change in current price relative to its amortized cost but the issuer's current credit rating and the probability of full recovery of principal based upon the issuer's financial strength. For corporate issues, we evaluate the financial stability and quality of asset coverage for the securities relative to the term to maturity for the issues we own. For asset-backed securities, we evaluate changes in factors such as collateral performance, default rates, loss severities and expected cash flows. At June 30, 2021, the amortized cost and fair value of securities on the watch list (all fixed maturity securities) are as follows:

General Description	Number of Securities	Amortized Cost	Allowance for Credit Losses	Amortized Cost, Net of Allowance	Net Unrealized Gains (Losses), Net of Allowance	Fair Value
(Dollars in thousands)						
Corporate securities - Public securities	5	\$ 69,739	\$ (10,033)	\$ 59,706	\$ 1,318	\$ 61,024
Corporate securities - Private placement securities	8	103,189	(690)	102,499	1,652	104,151
Residential mortgage backed securities	4	6,739	(120)	6,619	(69)	6,550
Commercial mortgage backed securities	4	46,059	—	46,059	(3,441)	42,618
Collateralized loan obligations	1	9,989	—	9,989	(1,113)	8,876
United States municipalities, states and territories	5	19,044	(3,347)	15,697	—	15,697
	<u>27</u>	<u>\$ 254,759</u>	<u>\$ (14,190)</u>	<u>\$ 240,569</u>	<u>\$ (1,653)</u>	<u>\$ 238,916</u>

We expect to recover the unrealized losses, net of allowances, as we did not have the intent to sell and it was not more likely than not that we would be required to sell these securities prior to recovery of the amortized cost basis, net of allowances. Our analysis of these securities and their credit performance at June 30, 2021 is as follows:

Corporate securities - public securities: The public corporate securities included on the watch list are primarily securities with exposure to the travel industry. The decline in value and the heightened credit risk on the securities with exposure to the travel industry is primarily due to the impact COVID-19 has had on the travel industry.

Corporate securities - private placement securities: The private placement securities included on the watch list are spread across numerous industries, the most significant of which is the airlines industry. The heightened credit risk on these securities is primarily due to the impact COVID-19 has had on the travel industry.

Structured securities: The structured securities included on the watch list have generally experienced higher levels of stress due to the impact COVID-19 is having on the economy. While there is a heightened level of credit risk for the structured securities on the watch list, we expect minimal credit losses on these securities based on our current analyses.

United States municipalities, states and territories: The decline in value of these securities, which are related to senior living facilities in the Southeastern region of the United States, is primarily due to the financial strain COVID-19 is having on this industry.

Credit Losses

We have a policy and process to identify securities in our investment portfolio for which we recognize credit loss. See Note 4 to our unaudited consolidated financial statements.

During the three months ended June 30, 2021, we recognized a benefit related to a reduction in the allowance for credit losses for our fixed maturity securities of \$1.3 million which included recoveries on corporate securities and residential mortgage backed securities offset by additional credit losses realized on municipal securities. During the six months ended June 30, 2021, we recognized credit losses of \$0.2 million which included credit losses on municipal securities and net credit losses on corporate securities partially offset by a net recovery on residential mortgage backed securities.

During the three and six months ended June 30, 2020, we recognized credit losses of \$18.4 million and \$46.7 million, respectively, on corporate securities with exposure to the offshore drilling industry and \$5.8 million and \$8.3 million, respectively, on commercial mortgage backed securities due to the impact of COVID-19 on the performance of the underlying collateral or our intent to sell the securities. In addition, during both the three and six months ended June 30, 2020, we recognized credit losses of \$0.8 million on residential mortgage backed securities due to the performance of the underlying collateral and \$0.1 million on a private placement security with exposure to the airlines industry. During the six months ended June 30, 2020 we recognized a credit loss of \$0.5 million on an asset backed security due to our intent to sell such security.

Several factors led us to believe that full recovery of amortized cost is not expected on the securities for which we recognized credit losses. A discussion of these factors, our policy and process to identify securities that could potentially have credit loss is presented in Note 4 to our unaudited consolidated financial statements in this Form 10-Q, which is incorporated by reference in this Item 2.

Mortgage Loans on Real Estate

Our financing receivables consist of three mortgage loan portfolio segments: commercial mortgage loans, agricultural mortgage loans and residential mortgage loans. Our commercial mortgage loan portfolio consists of loans with an outstanding principal balance of \$3.5 billion and \$3.6 billion as of June 30, 2021 and December 31, 2020, respectively. This portfolio consists of mortgage loans collateralized by the related properties and diversified as to property type, location and loan size. Our mortgage lending policies establish limits on the amount that can be loaned to one borrower and other criteria to attempt to reduce the risk of default. Our agricultural mortgage loan portfolio consists of loans with an outstanding principal balance of \$277.4 million and \$245.8 million as of June 30, 2021 and December 31, 2020, respectively. These loans are collateralized by agricultural land and are diversified as to location within the United States. Our residential mortgage loan portfolio consists of loans with an outstanding principal balance of \$573.6 million and \$366.3 million as of June 30, 2021 and December 31, 2020, respectively. These loans are collateralized by the related properties and diversified as to location within the United States. Mortgage loans on real estate are generally reported at cost adjusted for amortization of premiums and accrual of discounts, computed using the interest method and net of valuation allowances.

At June 30, 2021 and December 31, 2020, the largest principal amount outstanding for any single commercial mortgage loan was \$28.1 million and \$34.7 million, respectively, and the average loan size was \$4.7 million and \$4.8 million, respectively. In addition, the average loan to value ratio for commercial and agricultural mortgage loans combined was 53.4% and 53.6% at June 30, 2021 and December 31, 2020, respectively, based upon the underwriting and appraisal at the time the loan was made. This loan to value is indicative of our conservative underwriting policies and practices for making mortgage loans and may not be indicative of collateral values at the current reporting date. Our current practice is to only obtain market value appraisals of the underlying collateral at the inception of the loan unless we identify indicators of impairment in our ongoing analysis of the portfolio, in which case, we either calculate a value of the collateral using a capitalization method or obtain a third party appraisal of the underlying collateral. The commercial mortgage loan portfolio is summarized by geographic region and property type in Note 5 to our unaudited consolidated financial statements in this Form 10-Q, incorporated by reference in this Item 2.

In the normal course of business, we commit to fund commercial mortgage loans up to 90 days in advance. At June 30, 2021, we had commitments to fund mortgage loans totaling \$177.6 million, with interest rates ranging from 3.30% to 5.65%. During 2021 and 2020, due to historically low interest rates, the commercial mortgage loan industry has been very competitive. This competition has resulted in a number of borrowers refinancing with other lenders. For the six months ended June 30, 2021, we received \$111.2 million in cash for loans being paid in full compared to \$67.5 million for the six months ended June 30, 2020. Some of the loans being paid off have either reached their maturity or are nearing maturity; however, some borrowers are paying the prepayment fee and refinancing at a lower rate.

See Note 5 to our unaudited consolidated financial statements, incorporated by reference, for a presentation of our valuation allowance, foreclosure activity and troubled debt restructure analysis. We have a process by which we evaluate the credit quality of each of our mortgage loans. This process utilizes each loan's loan-to-value and debt service coverage ratios as primary metrics. See Note 5 to our unaudited consolidated financial statements, incorporated by reference, for a summary of our portfolio by loan-to-value and debt service coverage ratios.

We closely monitor loan performance for our commercial, agricultural and residential mortgage loan portfolios. Commercial, agricultural and residential loans are considered nonperforming when they are 90 days or more past due. Aging of financing receivables is summarized in the following table:

	Current	30-59 days past due	60-89 days past due	Over 90 days past due	Total
As of June 30, 2021:					
	(Dollars in thousands)				
Commercial mortgage loans	\$ 3,458,470	\$ —	\$ —	\$ —	\$ 3,458,470
Agricultural mortgage loans	275,131	1,588	—	—	276,719
Residential mortgage loans	572,344	10,142	2,992	5,859	591,337
Total mortgage loans	<u>\$ 4,305,945</u>	<u>\$ 11,730</u>	<u>\$ 2,992</u>	<u>\$ 5,859</u>	<u>\$ 4,326,526</u>
As of December 31, 2020:					
Commercial mortgage loans	\$ 3,578,888	\$ —	\$ —	\$ —	\$ 3,578,888
Agricultural mortgage loans	245,173	—	—	—	245,173
Residential mortgage loans	346,730	25,449	111	167	372,457
Total mortgage loans	<u>\$ 4,170,791</u>	<u>\$ 25,449</u>	<u>\$ 111</u>	<u>\$ 167</u>	<u>\$ 4,196,518</u>

Derivative Instruments

Our derivative instruments primarily consist of call options purchased to provide the income needed to fund the annual index credits on our fixed index annuity products. The fair value of the call options is based upon the amount of cash that would be required to settle the call options obtained from the counterparties adjusted for the nonperformance risk of the counterparty. The nonperformance risk for each counterparty is based upon its credit default swap rate. We have no performance obligations related to the call options.

None of our derivatives qualify for hedge accounting, thus, any change in the fair value of the derivatives is recognized immediately in the consolidated statements of operations. A presentation of our derivative instruments along with a discussion of the business strategy involved with our derivatives is included in Note 7 to our unaudited consolidated financial statements in this Form 10-Q, which is incorporated by reference in this Item 2.

Liquidity and Capital Resources

Our insurance subsidiaries generally have adequate cash flows from annuity deposits and investment income to meet their policyholder and other obligations. Net cash flows from annuity deposits and funds returned to policyholders as surrenders, withdrawals and death claims were \$1,468.1 million for the six months ended June 30, 2021 compared to \$(518.4) million for the six months ended June 30, 2020, with the increase attributable to a \$2,354.1 million increase in net annuity deposits after coinsurance and a \$367.6 million (after coinsurance) increase in funds returned to policyholders. We continue to invest the net proceeds from policyholder transactions and investment activities in high quality fixed maturity securities and mortgage loans. We have a highly liquid investment portfolio that can be used to meet policyholder and other obligations as needed. In addition, we intend to hold approximately 1% to 2% of our investment portfolio in cash and cash equivalents.

We, as the parent company, are a legal entity separate and distinct from our subsidiaries, and have no business operations. We need liquidity primarily to service our debt (senior notes and subordinated debentures issued to subsidiary trusts), pay operating expenses, and pay dividends to common and preferred stockholders. Our assets consist primarily of the capital stock and surplus notes of our subsidiaries. Accordingly, our future cash flows depend upon the availability of dividends, surplus note interest payments and other statutorily permissible payments from our subsidiaries, such as payments under our investment advisory agreements and tax allocation agreement with our subsidiaries. We expect these sources provide adequate cash flow for us to meet our current and reasonably foreseeable future obligations.

The ability of our life insurance subsidiaries to pay dividends or distributions, including surplus note payments, will be limited by applicable laws and regulations of the states in which our life insurance subsidiaries are domiciled, which subject our life insurance subsidiaries to significant regulatory restrictions. These laws and regulations require, among other things, our insurance subsidiaries to maintain minimum solvency requirements and limit the amount of dividends these subsidiaries can pay.

Currently, American Equity Investment Life Insurance Company ("American Equity Life") may pay dividends or make other distributions without the prior approval of the Iowa Insurance Commissioner, unless such payments, together with all other such payments within the preceding twelve months, exceed the greater of (1) American Equity Life's net gain from operations for the preceding calendar year, or (2) 10% of American Equity Life's statutory capital and surplus at the preceding December 31. For 2021, up to \$372.9 million can yet be distributed as dividends by American Equity Life without prior approval of the Iowa Insurance Commissioner. In addition, dividends and surplus note payments may be made only out of statutory earned surplus, and all surplus note payments are subject to prior approval by regulatory authorities in the life subsidiary's state of domicile. American Equity Life had \$2.1 billion of statutory earned surplus at June 30, 2021.

The maximum distribution permitted by law or contract is not necessarily indicative of an insurer's actual ability to pay such distributions, which may be constrained by business and regulatory considerations, such as the impact of such distributions on surplus, which could affect the insurer's ratings or competitive position, the amount of premiums that can be written and the ability to pay future dividends or make other distributions. Further, state insurance laws and regulations require that the statutory surplus of our life subsidiaries following any dividend or distribution must be reasonable in relation to their outstanding liabilities and adequate for their financial needs. Along with solvency regulations, the primary driver in determining the amount of capital used for dividends is the level of capital needed to maintain desired financial strength ratings from rating agencies. Both regulators and rating agencies could become more conservative in their methodology and criteria, including increasing capital requirements for our insurance subsidiaries which, in turn, could negatively affect the cash available to us from insurance subsidiaries. As of June 30, 2021, we estimate American Equity Life has sufficient statutory capital and surplus, combined with capital available to the holding company, to maintain its insurer financial strength rating. However, this capital may not be sufficient if significant future losses are incurred or a rating agency modifies its rating criteria and access to additional capital could be limited.

The transfer of funds by American Equity Life is also restricted by a covenant in our line of credit agreement which requires American Equity Life to maintain a minimum RBC ratio of 275% and a minimum level of statutory surplus equal to the sum of 1) 80% of statutory surplus at June 30, 2016, 2) 50% of the statutory net income for each fiscal quarter ending after June 30, 2016, and 3) 50% of all capital contributed to American Equity Life after June 30, 2016. American Equity Life's RBC ratio was 372% at December 31, 2020. Under this agreement, we are also required to maintain a maximum ratio of adjusted debt to total adjusted capital of 0.35.

Cash and cash equivalents of the parent holding company at June 30, 2021, were \$382.1 million. In addition, we have a \$150 million revolving line of credit, with no borrowings outstanding, available through September 2021 for general corporate purposes of the parent company and its subsidiaries. We also have the ability to issue equity, debt or other types of securities through one or more methods of distribution. The terms of any offering would be established at the time of the offering, subject to market conditions.

New Accounting Pronouncements

See Note 1 to our unaudited consolidated financial statements in this Form 10-Q, which is incorporated by reference in this Item 2.

Regulatory Developments

The U.S. Department of Labor (the "DOL") issued new guidance during the first quarter of 2021 broadening the criteria for when an advisor on ERISA or Individual Retirement Account products has a fiduciary duty to the client. Advisors who sell our products who may be fiduciaries will have more complex compliance and disclosure obligations, and as a result higher costs. In addition, to the extent the DOL requires a fiduciary institution to oversee such an advisor, we or the IMO's with whom we partner may have more complex compliance and disclosure obligations, and as a result higher costs and greater risk. The DOL has also indicated it intends to make further changes to the existing regulatory framework for providing fiduciary advice. While the scope and content of any such changes remain uncertain, they may include new rules and amending or revoking exemptions financial institutions rely on in providing services.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We seek to invest our available funds in a manner that will maximize shareholder value and fund future obligations to policyholders and debtors, subject to appropriate risk considerations. We seek to meet this objective through investments that: (i) consist substantially of investment grade fixed maturity securities, (ii) have projected returns which satisfy our spread targets, and (iii) have characteristics which support the underlying liabilities. Many of our products incorporate surrender charges, market interest rate adjustments or other features, including lifetime income benefit riders, to encourage persistency.

We seek to maximize the total return on our fixed maturity securities through active investment management. Accordingly, we have determined that our available for sale portfolio of fixed maturity securities is available to be sold in response to: (i) changes in market interest rates, (ii) changes in relative values of individual securities and asset sectors, (iii) changes in prepayment risks, (iv) changes in credit quality outlook for certain securities, (v) liquidity needs, and (vi) other factors.

Interest rate risk is our primary market risk exposure. Substantial and sustained increases and decreases in market interest rates can affect the profitability of our products and the fair value of our investments. The profitability of most of our products depends on the spreads between interest yield on investments and rates credited on insurance liabilities. We have the ability to adjust crediting rates (caps, participation rates or asset fee rates for fixed index annuities) on substantially all of our annuity liabilities at least annually (subject to minimum guaranteed values). Substantially all of our annuity products have surrender and withdrawal penalty provisions designed to encourage persistency and to help ensure targeted spreads are earned. In addition, a significant amount of our fixed index annuity policies and many of our annual reset fixed rate deferred annuities were issued with a lifetime income benefit rider which we believe improves the persistency of such annuity products. However, competitive factors, including the impact of the level of surrenders and withdrawals, may limit our ability to adjust or maintain crediting rates at levels necessary to avoid narrowing of spreads under certain market conditions.

A major component of our interest rate risk management program is structuring the investment portfolio with cash flow characteristics consistent with the cash flow characteristics of our insurance liabilities. We use models to simulate cash flows expected from our existing business under various interest rate scenarios. These simulations enable us to measure the potential gain or loss in fair value of our interest rate-sensitive financial instruments, to evaluate the adequacy of expected cash flows from our assets to meet the expected cash requirements of our liabilities and to determine if it is necessary to lengthen or shorten the average life and duration of our investment portfolio. The "duration" of a security is the time weighted present value of the security's expected cash flows and is used to measure a security's sensitivity to changes in interest rates. When the durations of assets and liabilities are similar, exposure to interest rate risk is minimized because a change in value of assets should be largely offset by a change in the value of liabilities.

If interest rates were to increase 10% (21 basis points) from levels at June 30, 2021, we estimate that the fair value of our fixed maturity securities would decrease by approximately \$711.9 million. The impact on stockholders' equity of such decrease (net of income taxes and certain adjustments for changes in amortization of deferred policy acquisition costs and deferred sales inducements and policy benefit reserves) would be a decrease of \$311.5 million in accumulated other comprehensive income and a decrease in stockholders' equity. The models used to estimate the impact of a 10% change in market interest rates incorporate numerous assumptions, require significant estimates and assume an immediate and parallel change in interest rates without any management of the investment portfolio in reaction to such change. Consequently, potential changes in value of our financial instruments indicated by the simulations will likely be different from the actual changes experienced under given interest rate scenarios, and the differences may be material. Because we actively manage our investments and liabilities, our net exposure to interest rates can vary over time. However, any such decreases in the fair value of our fixed maturity securities (unless related to credit concerns of the issuer requiring recognition of a credit loss) would generally be realized only if we were required to sell such securities at losses prior to their maturity to meet our liquidity needs, which we manage using the surrender and withdrawal provisions of our annuity contracts and through other means. See Financial Condition - Liquidity for Insurance Operations included in Management's Discussion and Analysis in our Annual Report on Form 10-K for the year ended December 31, 2020 for a further discussion of the liquidity risk.

The amortized cost of fixed maturity securities that are callable at the option of the issuer, excluding securities with a make-whole provision, was \$5.6 billion as of June 30, 2021. We have reinvestment risk related to these redemptions to the extent we cannot reinvest the net proceeds in assets with credit quality and yield characteristics similar to the redeemed bonds. Such reinvestment risk typically occurs in a declining rate environment. In addition, we have \$3.6 billion of floating rate fixed maturity securities as of June 30, 2021. Generally, interest rates on these floating rate fixed maturity securities are based on the 3 month LIBOR rate and are reset quarterly. Should rates decline to levels which tighten the spread between our average portfolio yield and average cost of interest credited on annuity liabilities, we have the ability to reduce crediting rates (caps, participation rates or asset fees for fixed index annuities) on most of our annuity liabilities to maintain the spread at our targeted level. At June 30, 2021, approximately 97% of our annuity liabilities were subject to annual adjustment of the applicable crediting rates at our discretion, limited by minimum guaranteed crediting rates specified in the policies. At June 30, 2021, approximately 18% of our annuity liabilities were at minimum guaranteed crediting rates.

We purchase call options on the applicable indices to fund the annual index credits on our fixed index annuities. These options are primarily one-year instruments purchased to match the funding requirements of the underlying policies. Fair value changes associated with those investments are substantially offset by an increase or decrease in the amounts added to policyholder account balances for fixed index products. The difference between proceeds received at expiration of these options and index credits, as shown in the following table, is primarily due to under or over-hedging as a result of policyholder behavior being different than our expectations.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
(Dollars in thousands)				
Proceeds received at expiration of options related to such credits	\$ 720,474	\$ 97,015	\$ 1,069,593	\$ 382,278
Annual index credits to policyholders on their anniversaries	714,291	97,875	1,060,028	376,815

On the anniversary dates of the index policies, we purchase new one-year call options to fund the next annual index credits. The risk associated with these prospective purchases is the uncertainty of the cost, which will determine whether we are able to earn our spread on our fixed index business. We manage this risk through the terms of our fixed index annuities, which permit us to change caps, participation rates and asset fees, subject to contractual features. By modifying caps, participation rates or asset fees, we can limit option costs to budgeted amounts, except in cases where the contractual features would prevent further modifications. Based upon actuarial testing which we conduct as a part of the design of our fixed index products and on an ongoing basis, we believe the risk that contractual features would prevent us from controlling option costs is not material.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

In accordance with the Securities Exchange Act Rules 13a-15(e) and 15d-15(e), our management, under the supervision of our Chief Executive Officer and interim Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report on Form 10-Q. Based on that evaluation, the Chief Executive Officer and interim Chief Financial Officer concluded the design and operation of our disclosure controls and procedures were effective as of June 30, 2021 in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports that we file or submit under the Exchange Act.

There were no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2021 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings**

See Note 9 - Commitments and Contingencies to the unaudited consolidated financial statements in this Form 10-Q, which is incorporated by reference in this Item 1, for any required disclosure.

Item 1A. Risk Factors

Our 2020 Annual Report on Form 10-K described our Risk Factors.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Securities**

The following table presents the amount of our share purchase activity for the periods indicated:

Period	Total Number of Shares Purchased (a) (shares)	Average Price Paid Per Share (dollars)	Total number of shares purchased as part of publicly announced program (b) (shares)	Approximate dollar value of shares that may yet be purchased under program (dollars in thousands)
January 1, 2021 - January 31, 2021	—	\$ —	—	\$ —
February 1, 2021 - February 28, 2021	550,490	\$ 28.44	541,631	\$ 335,000
March 1, 2021 - March 31, 2021	98,935	\$ 30.37	98,728	\$ 332,000

AMERICAN EQUITY INVESTMENT LIFE
HOLDING COMPANY

By: /s/ Scott A. Samuelson

Scott A. Samuelson

Vice President and Chief Accounting Officer

(Principal Accounting Officer and Duly Authorized Officer)

SEPARATION AGREEMENT

THIS SEPARATION AGREEMENT (this “*Agreement*”) is entered into as of May 26, 2021 (the “*Effective Date*”) between American Equity Investment Life Insurance Company (the “*Company*”) and Ted M. Johnson (the “*Executive*”) (collectively, the “*Parties*”).

WITNESSETH:

WHEREAS, effective May 21, 2021 (the “*Transition Date*”), Executive is no longer serving as Chief Financial Officer of the Company and is separating from all positions with the Company and its respective affiliates.

NOW, THEREFORE, in consideration of the mutual promises and agreements contained herein, the adequacy and sufficiency of which are hereby acknowledged, the Company and Executive agree as follows:

1. **Resignation and Termination of Employment.** Executive’s employment will be terminated and Executive hereby resigns, each effective as of the close of business on July 16, 2021 (the “*Termination Date*”). During the period commencing on the Transition Date and ending on the Termination Date (or such earlier date as mutually agreed between the Parties), Executive shall cooperate with and assist in the orderly transition of his duties (including without limitation, organizing the Executive’s files and documents in furtherance of facilitating an orderly transition of the Executive’s duties, functions and responsibilities) and shall diligently perform such other services as may be reasonably requested from time to time, provided that the Company may require Executive to perform any such tasks and/or services remotely without returning to the Company’s offices. As of the Transition Date, the Executive is no longer an officer of the Company and hereby resigns from all memberships, board memberships, officerships, positions as a trustee and/or fiduciary of the Company, any Company committee or group and any benefit plans of the Company and/or its subsidiaries and affiliates (collectively, the “*Company Group*”) as well as any other positions that the Executive holds in connection with the Executive’s relationship with the Company Group. The Executive hereby agrees to execute any implementing documentation that the Company may reasonably request in connection with such resignations and to ensure an orderly transition of authority including signing authority and contact personnel for vendors, investors, industry groups and trade associations. On and after the Transition Date, the Executive shall not represent himself as an officer, agent, or representative of the Company Group for any purpose. In consideration for the Executive’s execution within twenty-one (21) days of the Effective Date of this Agreement and the general release agreement in the form attached hereto as Exhibit B (the “*Waiver and Release*”) and non-revocation thereof, Executive’s current base salary shall remain in effect, and Executive (and his eligible dependents) shall also remain eligible to participate in the Company’s applicable employee benefit plans until the Termination Date, during which time the Executive shall remain subject to and comply with the Company’s code of business conduct and other employment policies; provided, however, the Parties may elect to accelerate the Termination Date to any date following the Effective Date (including upon Executive’s death or disability).

2. **Payment of Accrued Amounts.** Subject to the terms and conditions of this Agreement, the Company shall pay to Executive the portion of his annual salary that has accrued but is unpaid as of the Termination Date not later than the second payroll date after the Termination Date. In accordance with Company policy, Executive shall be reimbursed for any outstanding business expenses incurred consistent with the Company’s policy, up to the Termination Date pursuant to Company policy.

3. **Severance Benefits.** Subject to: (a) Executive’s successful completion of the tasks within the transition plan to be developed by management and a third party with financial expertise, with the opportunity for Executive to review and provide reasonable comments on the final transition plan (such comments will be included in the final transition plan subject to consent of management which consent will not be unreasonably withheld), and with Company approval of Executive’s completion of such transition plan also not to be unreasonably withheld, (b) timely execution and non-revocation of a supplemental general release agreement in the form attached hereto as Exhibit B not earlier than the day after the Termination Date (the “*Supplemental Waiver and Release*”), and (c) any other qualifications set forth herein, Executive shall receive the following benefits:

(a) **Cash benefits.** The Company shall pay to Executive the sum of:

1. Executive's monthly base salary for the number of full or partial months between the Termination Date and May 20, 2022;
2. \$501,375, which amount equals 125% of Executive's target incentive award for 2021; and
3. Subject to Executive's timely election of COBRA continuation coverage, a payment of \$15,000 for continuation of Executive's

health insurance coverage.

Payment of amounts set forth in Sections 3(a)(1)-3(a)(3) shall commence not later than 28 days after the Termination Date in substantially equal quarterly installments ending on March 15, 2022.

(b) **Long-Term Incentive Awards.** With respect to any outstanding equity awards granted to Executive by the Company, Executive shall be eligible for continued vesting and exercisability for the maximum period allowable under each applicable award agreement as if Executive had remained an active employee of the Company through the entire term of each such award agreement provided that all other terms and conditions set forth in the applicable award agreement and governing plan document(s) shall continue to apply. The respective payout amounts (if any) of such awards shall be determined in a manner consistent with that used to determine the amounts of such awards payable to active executives for such respective periods, and each such award shall be payable at the time or times such respective awards are paid to active executives and considered a separate, short-term deferral for purposes of Internal Revenue Code Section 409A ("Section 409A"). All such awards payable in shares shall be subject to the Company's applicable resale restrictions, if any. The specific equity awards granted to Executive by the Company to which this subparagraph shall apply are listed in Exhibit A hereto.

(c) **Executive and Other Benefits.**

1. If Executive is entitled to any benefit under any employee benefit plan of the Company that is accrued and vested on the Termination Date and that is not expressly referred to in this Agreement, such benefit shall be provided to Executive in accordance with the terms of such employee benefit plan.

2. The Company shall reimburse Executive for no more than \$15,000.00 as and when incurred for services rendered to Executive by a professional outplacement organization selected by Executive and approved by the Company to provide individual outplacement services (to be utilized, an outplacement firm must be identified, agreed upon by the Parties, and outplacement services must commence within nine months of the Termination Date).

3. Notwithstanding anything else contained in this Agreement to the contrary, Executive acknowledges and agrees that the payments and benefits under this Agreement are in lieu of, and he is not and shall not be entitled to, any entitlements, payments, or any other benefits under any severance or change in control plan, program, agreement or arrangement, including without limitation, under the Company's Severance Pay Policy and under that certain Change in Control Agreement, by and between the Company and the Executive, dated December 13, 2012, and that the benefits provided under this Agreement shall be the sole and exclusive benefits to which Executive may become entitled upon his termination of employment. In the event Executive dies prior to executing the Supplemental Waiver and Release, neither he, his estate, nor any other person shall be entitled to any further compensation or benefits under this Agreement, unless and until the executor of Executive's estate (and/or such other heirs or representatives as may be requested by the Company) executes upon Company request and does not revoke such a Supplemental Waiver and Release.

4. **Tax Withholding.** The Company shall deduct from the amounts payable to Executive pursuant to this Agreement the amount of all required federal, state and local withholding taxes in accordance with Executive's Form W-4 on file with the Company and all applicable social security and Medicare taxes.

5. **Waiver and Release.**

(a) Notwithstanding anything herein to the contrary, Executive's right to the payments and benefits under Section 1 of this Agreement shall be contingent upon Executive (i) successfully cooperating with and assisting in the orderly transition of his duties as may reasonably be set forth in a transition plan and as requested from time to time, (ii) having executed and delivered to the Company a Waiver and Release in no event more than 21 days after the Effective Date, (iii) not revoking such release in accordance with the terms of the release and (iv) Executive not violating any of Executive's ongoing obligations under this Agreement including, without limitation, the restrictive covenants set forth in Section 6 below (the "*Restrictive Covenants*").

(b) Notwithstanding anything herein to the contrary, Executive's right to the payments and benefits under Sections 2, 3(a), and 3(b) of this Agreement shall be contingent upon Executive (i) successfully cooperating with and assisting in the orderly transition of his duties as noted in Section 5(a)(i) above, (ii) having executed and delivered to the Company the Supplemental Waiver and Release not earlier than the Termination Date but in no event more than 21 days after the Termination Date, (iii) not revoking such release in accordance with the terms of the release and (iv) not violating any of Executive's ongoing obligations under this Agreement including without limitation the Restrictive Covenants described below.

6. **Restrictive Covenants.**

(a) **Noncompetition.** In consideration of the payments by the Company to Executive pursuant to Sections 2, 3(a), and 3(b) of this Agreement, Executive hereby covenants and agrees that, while employed by the Company and for the 18-month period following the Termination Date, Executive shall not, without the prior written consent of the Company, be employed by, engaged by, or otherwise assist, either as an individual on his own or as a partner, joint venturer, employee, agent, consultant, officer, trustee, director, owner, part-owner, shareholder, or in any other capacity, directly or indirectly, with any of the following entities: Apollo Global Management, Blackstone, Brookfield (solely with respect to matters involving the Company), the Carlyle Group, KKR & Co. Inc., Paulson Investment Company, or Sixth Street Partners, or any successor, affiliate or portfolio company of such entities that competes with the Company with respect to the sale of fixed index and fixed rate annuities. The foregoing restriction shall not include the passive ownership of securities in any entity listed above and the exercise of rights appurtenant thereto, so long as such securities represent no more than two percent of the voting power of all securities of such enterprise.

(b) **Nonsolicitation.** In further consideration of the payments by the Company to Executive pursuant to Sections 2, 3(a), and 3(b) of this Agreement, Executive hereby covenants and agrees that, while employed by the Company and for the 18-month period following the Termination Date, Executive shall not either directly or indirectly on Executive's own behalf or in the service or on behalf of others (i) attempt to influence, persuade or induce, or assist any other person in so influencing, persuading or inducing, any employee or independent contractor of the Company Group to give up, or to not commence, employment or a business relationship with the Company Group, (ii) unless otherwise in contravention of applicable law, directly, or indirectly through direction to any third party, hire or engage, or cause to be hired or engaged, any person who is an employee or independent contractor of the Company, or (iii) attempt to influence, persuade or induce, or assist any other person in so influencing, persuading or inducing, any agent, consultant, vendor, supplier or customer of the Company Group with whom Executive has had contact within the last twenty-four months of his relationship with the Company Group or about whom Executive has confidential information to give up or not commence a business relationship with the Company.

(c) **Nondisparagement.** The Executive shall not make any disparaging remarks or comments regarding the Company, its culture, its parents, affiliates and successors and its and their officers, directors, employees, agents and representatives. The Company shall inform its officers and directors not to make any disparaging remarks and comments regarding the Executive. The Parties further agree not to post or publish any information pertaining to Executive or the Company, its officers, directors or agents on the internet or in any manner. The Parties acknowledge that if either were to violate this covenant, the aggrieved party would not have adequate damages at law and that it would be appropriate for a court to enter an injunction prohibiting any further violation; further, if either party obtains a final judgment of a court of competent jurisdiction, pursuant to which either party is determined to have breached their obligations under this covenant, the prevailing party shall be entitled to recover, in addition to any award of damages, its reasonable attorneys' fees, costs, and expenses incurred in obtaining such judgment.

(d) **Failure to Disclose Material Financial Information.** Should Executive reveal information of a financial nature after the Transition Date, that should have been revealed prior to said date and that results in material financial harm to the Company, the Company shall be entitled to immediately cease paying any amounts remaining or due or providing any benefits to Executive pursuant to this Agreement.

(e) **Enforcement.**

1. Executive acknowledges and agrees that significant separation benefits have been offered in this Agreement and that each portion of this consideration is contingent upon the promises made by Executive in Section 6. Executive also acknowledges that the Company's remedies at law for a breach or threatened breach of any of the provisions of Section 6 would be inadequate and, in recognition of this fact, Executive agrees that, in the event of such a breach or threatened breach, in addition to any remedies at law, the Company shall be entitled to obtain equitable relief in the form of specific performance, temporary restraining order, temporary or permanent injunction or any other equitable remedy which may then be available.

2. In addition, the Company shall be entitled to immediately cease paying any amounts remaining due or providing any benefits to Executive pursuant to this Agreement in the event that Executive has breached any of Executive's obligations under this Section 6. In such event, the Company may require that Executive repay all cash amounts theretofore paid to Executive pursuant to this Agreement and, in such case, Executive shall promptly repay such amounts on the terms determined by the Company. Additionally, any equity that is still subject to restriction or performance criteria and/or is not yet fully vested and/or payable shall be forfeited. Notwithstanding anything to the contrary, any outstanding equity awards (including any shares issued upon vesting of the award) shall be subject to any clawback provisions set forth in the applicable award agreements and/or governing plan document(s) and all equity awards shall be subject to any clawback or recoupment policy adopted by the Board from time to time.

3. If the Company seeks a restraining order, an injunction or any other form of equitable relief, and recovers any such relief, the Company shall be entitled to recover its reasonable attorneys' fees, court costs, and other costs incurred obtaining that relief (even if other relief sought is denied). If the Company obtains a final judgment of a court of competent jurisdiction, pursuant to which Executive is determined to have breached his obligations under this Agreement, the Company shall be entitled to recover, in addition to any award of damages, its reasonable attorneys' fees, costs, and expenses incurred by the Company in obtaining such judgment.

4. The parties agree that the provisions of this paragraph are reasonable and necessary. Executive understands that the provisions of Sections 6(a) and 6(b) may limit Executive's ability to earn a livelihood in a business similar to the Company's business but he nevertheless agrees and hereby acknowledges that (a) such provisions do not impose a greater restraint than is necessary to protect the goodwill or other business interests of the Company, (b) such provisions contain reasonable limitations as to time and scope of activity to be restrained, (c) such provisions are not harmful to the general public, (d) such provisions are not unduly burdensome to Executive, and (e) the consideration provided hereunder is sufficient to compensate Executive for the restrictions contained in Sections 6(a) and 6(b). In consideration of the foregoing and in light of Executive's education, skills and abilities, Executive agrees that Executive shall not assert that, and it should not be considered that, any provisions of Sections 6(a) and 6(b) otherwise are void, voidable or unenforceable or should be voided or held unenforceable. It is expressly understood and agreed that although Executive and the Company consider the restrictions contained in Sections 6(a) and 6(b) to be reasonable, if a judicial determination is made by a court of competent jurisdiction that the time or territory or any other restriction contained in this Agreement is an unenforceable restriction against Executive, the provisions of this Agreement shall not be rendered void but shall be deemed amended to apply as to such maximum time and territory and to such maximum extent as such court may judicially determine or indicate to be enforceable. Alternatively, if any court of competent jurisdiction finds that any restriction contained in this Agreement is unenforceable, and such restriction cannot be amended so as to make it enforceable, such finding shall not affect the enforceability of any of the other restrictions contained herein.

7. **Confidential Information.** As part of and in connection with the execution of this Agreement between Executive and the Company, Executive acknowledges his ongoing obligation (pursuant to state law, Company policies, and his ethical obligations) to keep confidential Company information confidential.

8. **Certain Tax Matters.** The parties intend for this Agreement to comply with Section 409A. In the event the timing of any payment or benefit under this Agreement would result in any tax or penalty under Section 409A, the Company may reasonably adjust the timing of such payment or benefit if doing so will eliminate or materially reduce such tax or penalty and amend this Agreement accordingly. Executive acknowledges that Executive has been advised to consult Executive's personal tax advisor concerning this Agreement and has not relied on the Company for tax advice. The Company shall have the sole discretion to determine the actual date of any payments made hereunder. In no event may the Executive, directly or indirectly, designate the calendar year of any payment to be made under this Agreement that is considered nonqualified deferred compensation.

9. **Return of Company Property.** As requested and no later than the Termination Date, Executive agrees that he shall immediately return to the Company any owned physical and electronic property or intellectual property, including but not limited to, any and all documents, files, or other materials, as well as any and all physical equipment, materials, supplies or other property of the Company.

10. **Other Employment; Other Plans.** Executive shall not be obligated to seek other employment or take any other action by way of mitigation of the amounts payable to Executive under any provision of this Agreement. The amounts payable hereunder shall not be reduced by any payments received by Executive from any other employer.

11. **Cooperation by Executive.** During the period between the Executive's Termination Date and March 15, 2022, Executive shall be reasonably available to the Company to respond to requests by it and its Representatives for truthful and complete interviews and production of information pertaining to or relating to matters which may be within the knowledge of the Executive. Additionally, for an indefinite period of time, Executive shall not assist in the presentation or prosecution of any disputes, differences, grievances, claims, charges or complaints on behalf of any private or third party against any of the parties

released under this Agreement, the Waiver and Release or the Supplemental Waiver and Release; however, nothing herein shall be construed as prohibiting Executive from participating as required by order, law, subpoena or otherwise in any investigation, proceeding, or action initiated or pursued by any state or federal regulatory agency or body. Executive shall cooperate fully with the Company in connection with any existing or future investigation, proceeding, dispute, claim, litigation or other proceedings brought by or against the Company, its subsidiaries or affiliates, to the extent Company reasonably deems the Executive's cooperation necessary, including truthful interviews, depositions, testimony, production or execution of documentation in any way related to such proceeding.

12. **Successors; Binding Agreement.** This Agreement shall inure to the benefit of and be binding upon the Company Group and its successors, and by Executive, his spouse or domestic partner, personal or legal representatives, executors, administrators and heirs. This Agreement, being personal, may not be assigned by Executive.

13. **Governing Law.** This Agreement is made and entered into in the State of Iowa, and shall in all respects be interpreted, enforced and governed under the laws of Iowa. The language of all parts of this Agreement shall in all cases be construed as a whole, according to its fair meaning, and not strictly for or against any of the parties.

14. **Entire Agreement.** This Agreement, the Waiver and Release and the Supplemental Waiver and Release constitute the entire agreement and understanding between the Parties with respect to the subject matter hereof and supersede and preempt any other understandings, agreements or representations by or between the Parties, written or oral, which may have related in any manner to the subject matter hereof. Executive acknowledges that the Company has made no representations regarding the tax consequences of payments under this Agreement and has had the opportunity to consult Executive's tax advisor.

15. **Counterparts.** This Agreement may be executed in two counterparts, each of which shall be deemed to be an original and both of which together shall constitute one and the same instrument.

16. **Miscellaneous.** No provision of this Agreement may be modified or waived unless such modification or waiver is agreed to in writing and executed by Executive and by a duly authorized officer of the Company. No waiver by either party hereto at any time of any breach by the other party hereto of, or compliance with, any condition or provision of this Agreement to be performed by such other party shall be deemed a waiver of similar or dissimilar provisions or conditions at the same or at any prior or subsequent time. Failure by Executive or the Company to insist upon strict compliance with any provision of this Agreement or to assert any right which Executive or the Company may have hereunder shall not be deemed to be a waiver of such provision or right or any other provision or right of this Agreement.

17. **Beneficiary.** If Executive dies prior to receiving all of the amounts payable hereunder (other than amounts payable under any plan referenced in Section 3(c), which shall be governed by any beneficiary designation in effect thereunder) but after executing the Supplemental Waiver and Release, such amounts shall be treated the same as if the employee had died while in active service with the Company.

18. **Nonalienation of Benefits.** Benefits payable under this Agreement shall not be subject in any manner to anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, or charge, prior to actually being received by Executive, and any such attempt to dispose of any right to benefits payable hereunder shall be void.

19. **Severability.** If all or any part of this Agreement is declared by any court or governmental authority to be unlawful or invalid, such unlawfulness or invalidity shall not serve to invalidate any portion of this Agreement not declared to be unlawful or invalid, except that in the event a determination is made that the Restrictive Covenants as applied to Executive are invalid or unenforceable in whole or in part, then this Agreement shall be void and the Company shall have no obligation to provide benefits hereunder. Any paragraph or part of a paragraph so declared to be unlawful or invalid shall, if possible, shall be construed in a manner which will give effect to the terms of such paragraph or part of a paragraph to the fullest extent possible while remaining lawful and valid.

20. **Sections.** Except where otherwise indicated by the context, any reference to a "Section" shall be to a Section of this Agreement.

IN WITNESS WHEREOF, the Company has caused this Agreement to be executed by a duly authorized officer and Executive has executed this Agreement as of the day and year first above written.

EXHIBIT B

FORM OF WAIVER AND RELEASE UNDER SEPARATION AGREEMENT

In consideration for Executive receiving those payment and benefits under the Separation Agreement (the “*Separation Agreement*”) dated as of May 26, 2021 by and between Ted M. Johnson (the “*Executive*”) and American Equity Investment Life Insurance Company (terms capitalized but not defined herein shall have the meaning set forth in the Separation Agreement), Executive hereby agrees as follows:

1. Executive hereby irrevocably and unconditionally releases, remises, and forever discharges the Company and each of the Company’s owners, members, insurers, stockholders, agents, directors, officers, employees, representatives, attorneys, divisions, subsidiaries, affiliates, and its and their predecessors, successors, heirs, executors, administrators and assigns, and all persons acting on behalf of, by, through, under or in concert with any of them (the “*Releasees*”) from any and all actions, causes of action, suits, debts, charges, complaints, claims, liabilities, obligations, promises, agreements, controversies, damages, and expenses (including attorneys’ fees and costs), of any nature whatsoever, in law or equity, which he ever had, now has, or he or his heirs, executors and administrators hereafter may have, from the beginning of time to the date of Executive’s execution of this Waiver and Release Agreement (the “*Agreement*”), arising from, or otherwise related to, his employment relationship with the Company or the termination thereof, including, but not limited to, any claims arising from any alleged violation by the Company of any federal, state or local statutes, ordinances or common laws, including but not limited to, the Rehabilitation Act of 1973, 29 U.S.C. § 701 *et seq.*; the Americans with Disabilities Act of 1990, 42 U.S.C. § 12101 *et seq.*; Title VII of the Civil Rights Act of 1964, 42 U.S.C. § 2000e *et seq.*; the Age Discrimination in Employment Act, 29 U.S.C. § 621 *et seq.*, as amended by the Older Workers Benefit Protection Act; the Equal Pay Act, 29 U.S.C. § 206(d) *et seq.*; the Fair Labor Standards Act of 1938, 29 U.S.C. § 201 *et seq.*; the Family and Medical Leave Act, 29 U.S.C. § 681 *et seq.*; the Iowa Civil Rights Act of 1965, Iowa Code Chapter 216; and Iowa’s Wage Payment and Collection Act, Iowa Code Chapter 91A or any other federal, state or local laws, ordinances, regulations or Executive Orders prohibiting employment discrimination. Executive also represents that Executive has not pledged, given or sold any portion of any claim discussed in this Agreement to anyone else.

2. Executive agrees, promises and covenants that neither he, nor any person, organization or any other entity acting on his behalf will file, charge, claim, sue or cause or permit to be filed, charged or claimed, any action for damages or other relief (including injunctive, declaratory, monetary relief or other) against Company, its parents, affiliates and successors and its and their officers, directors, employees, insurers, agents and representatives, involving any matter which occurred in the past up to the date of this Agreement, including any continuing effects thereof, or otherwise involving any claims, demands, causes of action, obligations, damages or liabilities which are the subject of this Agreement. Nothing in this Agreement shall be construed to prohibit Executive from filing a charge with or participating in an investigation or proceeding conducted by the EEOC, the SEC or any other federal agency, the Iowa Civil Rights Commission or a comparable state or local agency. Notwithstanding the foregoing, Executive hereby waives, releases and forever relinquishes his right to recover monetary damages in any administrative charge he may file.

3. a. Executive acknowledges and agrees that it is necessary for Company to prevent the unauthorized use and disclosure of Proprietary and Confidential Information, as defined herein. Accordingly, and in further consideration for the payment set forth in paragraph 1, Executive agrees that he will not, directly or indirectly, (i) engage in or refrain from taking any action that may in any way lead to the disclosure of any Proprietary and Confidential Information regarding Company to any third party (other than a federal or state regulatory agency or body as required pursuant to Section 11 of the Separation Agreement), nor (ii) use any such Proprietary and Confidential Information for his own benefit. Subject to any disclosure required pursuant to Section 11 of the Separation Agreement, Executive specifically agrees and understands that he shall not disclose or communicate to any other person or entity any Proprietary and Confidential Information acquired by him during the course of his employment with the Company.

b. For purposes of this Agreement, “Proprietary and Confidential Information” shall mean all information in any form that is proprietary and confidential to Company and shall include, but not be limited to, the following types of information: (i) corporate information, including contractual arrangements, plans, strategies, tactics, policies and resolutions; (ii) any litigation or negotiations; (iii) financial information, including cost and performance data, debt arrangement, equity structure, investors and holdings; (iv) operational information, including trade secrets, control and inspection practices, suppliers and vendors; and (v) personnel information, including personnel lists, resumes, personal data, medical information, compensation, organizational structure and performance evaluations. Proprietary and Confidential Information does not include information that is or becomes generally part of the public domain without breach of this Agreement by Executive.

c. Executive further agrees that any and all Proprietary and Confidential Information is and shall remain the sole and exclusive property of Company, as applicable, and that all physical reproductions of any nature pertaining to any Proprietary and Confidential Information, including, but not limited to, electronic medium, memoranda, notebooks, notes, data sheets and records, and any and all copies of the same, shall be returned to Company immediately.

4. Executive expressly acknowledges this Agreement is intended to include in its effect, without limitation, any and all claims concerning his employment with the Company of which Executive knows or does not know, should have known, had reason to know or suspect existed in Executive's favor at the time of execution hereof. Executive recognizes this Agreement extinguishes any such claim or claims and that he has no legal recourse, now or in the future, against the Company for any of the claims set forth herein.

5. Executive represents and certifies that he has carefully read, and fully understands, all of the provisions and effects of this Agreement and the Separation Agreement. Executive further represents and certifies that he entered into this Agreement voluntarily and that neither the Company nor its agents, representatives or attorneys, made any representations concerning the terms or effects of this Agreement other than those contained herein.

6. Should any tax liability, interest or penalties occur under federal or state law or regulations as a result of the payments made pursuant to the Separation Agreement, Executive agrees to be solely responsible for, and to timely pay, Executive's portion of any and all such obligations. It is intended that any amounts payable to Executive pursuant to the Separation Agreement be exempt from Internal Revenue Code Section 409A ("Section 409A"), including, but not limited to, as a "short-term deferral" or as "severance pay" described in Treasury Regulations Sections 1.409A-1(b)(4) and 1.409A-1(b)(9)(iii), respectively. To the extent any amount payable pursuant to the Separation Agreement is subject to Section 409A, the Separation Agreement's terms and any exercise of authority or discretion by Company or Executive hereunder are intended to comply with and be construed in accordance with Section 409A.

7. This Agreement is made and entered into in the State of Iowa, and shall in all respects be interpreted, enforced and governed under the laws of Iowa without regard to any state's conflicts of laws principles. The language of all parts of this Agreement shall in all cases be construed as a whole, according to its fair meaning, and not strictly for or against any of the parties.

8. Should a court declare or determine any provision of this Agreement to be illegal or invalid, the validity of the remaining parts, terms or provisions shall not be affected thereby. It is the parties' intent that the part, term or provision declared or determined to be illegal or invalid shall be deemed not to be a part of this Agreement.

9. Pursuant to the terms of the Older Workers' Benefit Protection Act and the Age Discrimination in Employment Act, Company hereby advises Executive to consult with an attorney prior to signing this Agreement. Executive acknowledges that:

- a. He is entering into this Agreement and releasing, waiving and discharging rights or claims only in exchange for consideration which he is not already entitled to receive;
- b. He has been advised to consult with an attorney before executing this Agreement, he has consulted or had the opportunity to consult with an attorney of his choosing concerning the terms and conditions of this Agreement prior to signing this Agreement;
- c. He has been advised, and is being advised by this Agreement, that he has twenty-one (21) days within which to consider this Agreement, and he hereby acknowledges that in the event that he executes this Agreement prior to the expiration of the twenty-one (21) day period, he waives the balance of said period and acknowledge that his waiver of such period is knowing, voluntary and has not been induced by the Company or any Releasee through fraud, misrepresentation, or threat; and
- d. This Agreement waives no rights or claims that may arise after its execution.

PLEASE READ CAREFULLY. BY SIGNING THIS DOCUMENT, YOU ARE RELEASING ALL KNOWN CLAIMS. YOU HAVE A PERIOD OF AT LEAST TWENTY-ONE (21) DAYS TO CONSIDER THIS RELEASE OF CLAIMS. IF YOU SIGN THIS AGREEMENT YOU WILL HAVE UP TO SEVEN (7) DAYS FOLLOWING THE DATE YOU SIGN IT TO REVOKE YOUR SIGNATURE. THE RELEASE SHALL NOT BECOME EFFECTIVE OR ENFORCEABLE UNTIL THIS SEVEN (7) DAY PERIOD HAS EXPIRED.

10. Should Executive decide to revoke this Agreement after he has signed it, Executive can do so only by delivering a written notification of his revocation, no later than the seventh day after he signs this Agreement, to: American Equity Investment Life Insurance Company, Attention: Chief Human Resources Officer, 6000 Westown Parkway, West Des Moines, IA 50266. If Executive revokes this Agreement, it shall not be effective or enforceable, and Executive will not receive the severance benefits under the Separation Agreement, other than fifty dollars (\$50).

IN WITNESS WHEREOF, and intending to be legally bound hereby, Executive and the Company have executed the foregoing Agreement.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Anant Bhalla, certify that:

1. I have reviewed this quarterly report on Form 10-Q of American Equity Investment Life Holding Company;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
